Research Design for Social Work and the Human Services integrates a range of research techniques into a single epistemological framework and presents a balanced approach to the teaching of research methods in the "helping professions." Jeane W. Anastas begins with a discussion of the different philosophical perspectives within which social research occurs and continues with problem formulation, research design, and methodological issues influencing data collection, analysis, and dissemination. She presents both fixed (quantitative) and flexible (qualitative) methods of research, granting legitimacy, value, utility, and relevance to both styles of inquiry. Utilizing complete case studies to

illustrate different methodological approaches, Research Design for Social Work and the Human Services integrates material on women and people of color, and draws attention to the ways racism, heterosexism, sexism, and classism affect the conceptualization and conduct of research. Anastas not only exposes these biases but actively addresses the experiences, needs, and concerns of clients of both genders and different races, ethnicities, sexual orientations, cultures, and classes.

She wrote Writing Skills Revisited to provide the basic tools necessary to enable all students to reach their potentials. The manual helps students become skillful and proficient writers. It begins with the basic parts of speech and clarifies the process of how to develop sentences, paragraphs and essays -- culminating in how to develop a term paper. Also explained is the process of how to create a workable outline and the importance of having and using a good quality outline. Properly giving credit to quoted and/or paraphrased information is also detailed.

Sewing patterns have been the principle blueprint for making garments in the home for centuries. From their origins in the tailoring manuals of the 16th century to the widely produced pamphlets of the 18th and 19th centuries, through to the full size packet patterns of today, their history and development has reflected major changes in technology (such as the advent of the sewing machine), retailing and marketing practices (the fashion periodical), and shifts in social and cultural influences. This accessible book explores this history, outlining innovations in patternmaking by the companies who produced patterns and how these reflected the fashions and demands of the market. Showcasing beautiful illustrations from original pattern pamphlets, packets and ads, as well as 9 complete patterns from which readers can reproduce vintage garments of different eras, the book provides a unique visual guide to homemade fashions as well as essential exploration of the industry that produced them.

What sets this collection apart in the literature is its direct, personal style. Experienced supervisors as well as younger scholars speak to beginning researchers in interpreting, and more generally in Translation Studies. The contributors, who are very familiar with the difficulties beginners experience, focus on their needs and anticipate their questions. They reflect, analyze and advise, with illustrations from their own experience. Issues discussed include topic selection, project planning, time management, 'doctoral stress', the use of the literature, critical reading and book reviews, supervisor-supervisee relations, institutional frameworks for research training, issues in empirical research, theoretical analysis, and the role of small projects. Readers will thus find answers to many personal, institutional and methodological questions, which are common to beginners in many disciplines and in many paradigms.
