Brian La Trobe retired from Dental practice in 1986 to pursue his environmental interests. He designed South Africa's first energy from waste programme using the landfill site of Grahamstown South Africa. Later, on behalf of the South African Research Commission, he researched and developed a sanitation treatment system which required no water. He then established a company to field test the technology. Finally in 1993 the Enviro Loo unit went into production. To date some 55,000 units have been sold into the African market and exported internationally to many Countries, including the USA. Some years ago, he retired as Chairman of Enviro Options (Pty) Ltd. He now lives in retirement with his wife, Peggy, in Johannesburg where he occupies his time recording old memories.

Consolidates the information LC-MS bioanalytical scientists need to analyze small molecules and macromolecules. The field of bioanalysis has advanced rapidly, propelled by new approaches for developing bioanalytical methods, new liquid chromatographic (LC) techniques, and new mass spectrometric (MS) instruments. Moreover, there are a host of guidelines and regulations designed to ensure the quality of bioanalytical results. Presenting the best practices, experimental protocols, and the latest understanding of regulations, this book offers a comprehensive review of LC-MS bioanalysis of small molecules and macromolecules. It not only addresses the needs of bioanalytical scientists working on routine projects, but also explores advanced and emerging technologies such as high-resolution mass spectrometry and dried blood spot microsampling. Handbook of LC-MS Bioanalysis features contributions from an international team of leading bioanalytical scientists. Their contributions reflect a review of the latest findings, practices, and regulations as well as their own firsthand analytical laboratory experience. The book thoroughly examines: Fundamentals of LC-MS bioanalysis in drug discovery, drug development, and therapeutic drug monitoring. The current understanding of regulations governing LC-MS bioanalysis. Best practices and detailed technical instructions for LC-MS bioanalysis method development, validation, and stability assessment of analyte(s) of interest. Experimental guidelines and protocols for quantitative LC-MS bioanalysis of challenging molecules, including pro-drugs, acylglucuronides, N-oxides, reactive compounds, and photosensitive and autooxidative compounds. With its focus on current bioanalytical practice, Handbook of LC-MS Bioanalysis enables bioanalytical scientists to develop and validate robust LC-MS assay methods, all in compliance with current regulations and standards.

This workbook synthesizes materials we have developed since the initiation of an online course on elementary Mungaka. It is intended to provide users with a deeper understanding of the new Mungaka alphabet, its sounds and other basic writing conventions. Although it is prepared with a Mungaka 101 learner in mind, the book could be useful for individuals who have never taken a course in the new alphabet. We have therefore aimed to provide the reader with a broad but elementary material that will enable them to master the essentials of the Mungaka

alphabet and how to use them in everyday written and spoken contexts.

Facebook Post--May 26, 2013 "But Mary treasured up all these things and PONDERED them in her heart." Luke 2:19 NIV. 'Pondered'--I love that word. I love the look on the face of a pondering child. I love the words from the mouth of a pondering grown-up. Isn't it interesting that God chose a pondering heart in which to do such a mighty work? Is His Spirit searching the face of this earth right now for a pondering heart in which to do some mighty work? I suspect so. Could He do a mighty work in my pondering heart? I hope so. I need Him to. My God pondering goes on. Is that part of what God uses to see us through the heartbreaks of our lives--the ordinary? Is that how He brings peace and joy to a "peace and joy" starved heart--through the ordinary? Does He put us in a place, after putting us in THE PLACE where we can do something marvelous that we could never imagine of ourselves? I wonder how often Mary pondered the question: Why is this happening to me? Oh what a gift--a pondering heart. This is my story--my ponderings in script--my journey from the wilderness of an empty, pain-filled heart to the wonder even in the pain when I ponder the majesty of God, the mystery of God, and the mercy of God. Do come and ponder with me

Foreword In this era's informational paradigm, while pondering the considerations to be penned in this foreword, the relevance of a text such as this emerged progressively as the focal point. After all, for years, one established source for accessing large amounts of valuable information had been the Encyclopaedia Britannica, a printed tome, which is no longer relevant. Instant access to the latest scientific information is freely available to all with an internet. So, what can this text provide that cannot be readily accessed? In contemplating given topics, the Editors, as most certainly occurred in this publication, chose clinical authorities to author chapters in their areas of expertise. The experienced clinician often finds

such a forum a unique opportunity to reflect on years of knowledge acquisition and then render an insightful discourse on the lineage of his/her current understanding of the topic. On the other side of the coin, the reader instantly acquires a knowledge base, which was validated with an exhaustive literature search and gains the senior authors' perspective of it. A less experienced author will benefit from thoroughly reviewing the currently available science and technology and moreover, gain experience in scientific writing. In the latter scenario the senior author is at once mentor and expert. Under ordinary circumstances, from the concept outline submission to a publisher, the time line to completion of the text is approximately one and a half to two years. Recruiting and assigning authors, awaiting late manuscript submissions and editing are unquestionably time consuming. Yet a passionate, dedicated Editor will take seemingly varied submissions and script them into a worthy finished product. Such was the case with this publication. The end result is a superbly structured text covering most of the concepts relating to the topic in a format that is both logical and intuitive. At the risk of some redundancy, I share with you my thoughts on some of the significant number of new additions and improvements made to this second edition. The chapter on risk management is a welcome contribution. The rationale for the shift in the current decision tree for laryngeal cancer as it relates to macro versus micro margins, improvements in voice quality and the choice of initial therapeutic considerations are appropriately vetted. The rethinking of HPV associated malignancies is a new and most important addition. Zeitels' presentation of angiolytic lasers for benign and malignant pathology is state of the art. I particularly enjoyed reading about lasers and the association with tropical diseases. The chapters on robotic surgery, non-invasive cartilage reshaping and photo-diagnostics puts the latest technical innovation in our discipline into perspective. The excellent illustrations and photographs are a bonus. There are other areas that could be mentioned e.g. paediatrics, however, the aforementioned has more than adequately established the tenor of the text. In their quest to provide a one-stop knowledge base of a reference quality, it is inescapable that the size of the final proof would surpass the typical numbers of between four and five hundred pages for the hard bound volume. Tightening the text by removing some peripheral material would deprive the book its very objective of a reference quality publication. The obvious solution was to present the work in a set of two volumes, and the editors and the publishers have to be congratulated in achieving this seamlessly. The natural anatomical split provides the reader with a convenience of picking up the volume of relevance for the task at hand. An unusual feature is the inclusion of MCQs after each chapter, to serve as a test for recall of knowledge, the result of which can be assessed simply by going back to the chapter! The Editors and the publishers have exploited the now ubiquitous electronic media network to their advantage. Operating on various platforms a dedicated website will complement the book with updates, operative videos, and means of communication to share the knowledge globally. It was the focus of this brief foreword to explore the relevance of this text in the current informational climate. It provides the essential foundation for informed thought on this topic. Agree or disagree with the information contained within, the reader has acquired the knowledge to be able to do such. With this text you will be rewarded for sitting in your most comfortable chair, thumbing through the pages and sensing the new print. Immediately understood will be the time and effort it took to complete a text of this calibre. Read the chapters first that initially appeal to you and then without

question you will read the remainder. This book should be in the library of any serious student of the subject. I feel privileged to have been asked to write the foreword. Marshall Strome

The lands of Moura and Parenadra have seen dangerous times before, but always had the dragon riders to defend the justice of the world. But one rider turned to darkness, and slowly the people who once faithfully looked to the skies in times of trouble began to doubt the loyalty of riders. Now as the evil queen known only as Amora rises to control the world, with the dragon riders exiled from the people who once loved them and living in hiding, there is no one to defend when armies sweep Moura. But hope is found when the riders are called again by their brethren to return, and a new king is found to a once-powerful nation all but lost. And hope is found in an unlikely king who once dreamed of riding the skies on a dragon of his very own. When his wish comes true, Daniel Sage and his dragon Leafwing (with a fiery attitude despite an inability to create fire) set off on a quest to defend their world from certain doom. Along the way they befriend nymphs, battle giant birds, and learn that you must become who you were always meant to be-- even if its the last person you want to. But darkness lies before Daniel. His parents die, he must leave behind his sister, and he must face the terrible truth-- that Amora holds a shocking connection to him.

## **Teaching in Lifelong Learning: A Guide to Theory and Practice**

Designed for upper-level and professional courses, this text is a state-of-the-art introduction to the public policymaking process that gives equal attention to issues of policy implementation and public governance. It uses an innovative systems approach, integrating the activities, actors, tools, and techniques of policymaking, to provide a comprehensive framework for policy design and analysis. The book is practice-oriented, with a focus on the ways that policymakers at all levels employ the standard technologies of governance--authority, agency, program, rule, contract, and budget--to design policy outputs and achieve policy outcomes. Through extensive use of graphics, the text makes concepts easy to grasp for a generation of students accustomed to the visual presentation of ideas. Case studies illustrate the tools and techniques discussed, and key terms, questions for discussion, and suggested readings round out each chapter. Among the many emerging issues covered in this text that will be especially relevant for upper-level and professional programs and student-practitioners are: --program design --performance management --public contracting --policy networks --venue shopping --commercial and nonprofit sector participation in the policymaking process.

Buddhism Plain and Simple offers a clear, straightforward treatise on Buddhism in general and on awareness in particular. When Buddha was asked to sum up his teaching in a single word, he said, "Awareness." The Buddha taught how to see directly into the nature of experience. His observations and insights are plain, practical, and down-to-earth, and they deal exclusively with the present. Longtime teacher of Buddhism Steve Hagan presents the Buddha's uncluttered, original teachings in everyday, accessible language unencumbered by religious ritual, tradition, or belief.

The demands for better corporate leadership and governance continue to receive greater attention in the media. Given the significant failures in the boardroom from companies such as Enron, Global Crossings, WorldCom, Digital Equipment Corporation, Bre X, Credit Suisse, First Boston, Credit Lyonnais, Adelphia, Paramalat and Tyco, the board of director position is a pivotal role. Navigating this potential minefield is difficult but not impossible. In *Corporate Governance: A Board Directors Pocket Guide*, authors Dr. Eric Yocam and Dr. Annie Choi present the corporate governance principles in a complete and accessible manner. This second edition not only provides access to vital information on corporate governance, but also offers a source of the best critical leadership practices for the director. Organized in a convenient and easy-to-use format, this guide discusses numerous corporate governance topics, including: Board characteristics Director effectiveness Director mentoring Compliance Risk management Capability maturity models Total Cost of Ownership (TCO) technique Emerging governance trends This pocket guide promotes corporate governance awareness to an audience beyond the active corporate director for profit and nonprofit companies. Investors, instructors, students, governance practitioners, lawyers, international readers, and anyone interested in corporate governance can achieve greater understanding of a topic essential to today's business success.
