Fundamental Neuroscience

Someone asked me who the first hippies were, those unknowns who kicked off the psychedelic era of the 1960s. Were they born-too-late beatniks who arrived at the party after everybody had gone home? Or were they something else? Something new? I actually knew some of those first freaks. In fact, they were the first few friends I had. This trip starts in Nineteenth Avenue Park, San Mateo, California, winter of 1958, muddy raw subdivision streets, brine shrimped salt flats stretching to the Bayshore Freeway and beyond to sorrowful tract houses of Norfolk Street. The ground I sprung from. But we won't tarry. We'll hit the road through the vast Sonoran Desert on solitary two-lane highways spring of 1961 to adventures in Mexico, then on to steaming East Village summer to swirling fog over North Beach, broken hearted spring of 1962. Along the way, we'll stop at the corner of Seventh and Judah Street in San Francisco's Inner Sunset to watch a girl named Solveig rush out our door with 'Ban the Bomb' placards banging against her shoulder. We'll scene shift till midnight to watch Peter Weissinger swing over the stair rail into teens crashing our big peacenik party and whomping on them in peacenik joy. We'll contemplate a ghostly Carmen O'Shaughnessy stride through the archway in badass logger boots, tawny lionhair in long braids, brassy confident smile and my handmade Mexican chaleco. Snow is falling over Long Island, the first winter rains are pouring into the sewers of Lily Alley, San Francisco. Carmen has jumped off the bus in Barstow, hitched home across the desert and there is not a damn thing I can do about it. Summer 1964 in the Langley Porter Psychiatric Day Care Center for Mind-Blown Proto-Hippies and Hysterical Teenagers, the passengers are unraveling hidden meanings within Sally Go Round the Roses by the Jaynettes. They hear the Bomb, the war, the police dogs attacking demonstrators, fire hoses of death, J Edgar Hoover vs the Commies, peyote, pot, fear, angst, and - hey everybody, it's Mashed Potatoes Time. Look, the sky has gone blue, the golden city beckons. It's spring again. Let's stroll down to the North Beach Arts Festival to find my friends. Come on, they want to meet you. The First Few Friends I Had.

Deprogramming Black America is an ever-evolving and dynamic foundation to both establish and re-establish a core set of guide lines dedicated to creating, restoring, and officially documenting a pride in being of an African in America. (African First - then American). It is not my intent to impose a set way of thinking but to offer a suggested primary set of standards and recommendations that will assist people of African with the new quest for pride. This book is long overdue, yet right on time. I believe that the past, present and the future all exist on some plain at the same time, and that the words and energy of the many great men and women that inspired this book will forever be a light and a tribute to the Africans and people of African descent that both walked before us and continue to walk with us, as we form this discipline of the mind needed to deprogram this generation of Black America.

After decades of stagnation, the size of Latin America's middle class recently expanded to the point where, for the first time ever, the number of people in poverty is equal to the size of the middle class. This volume investigates the nature, determinants and possible consequences of this remarkable process of social transformation. We propose an original definition of the middle class, tailor-made for Latin America, centered on the concept of economic security and thus a low probability of falling into poverty. Given our definition of the middle class, there are four, not three, classes in Latin America. Sandwiched between the poor and the middle class there lies a large group of people who appear to make ends meet well enough, but do not enjoy the economic security that would be required for membership of the middle class. We call this group the 'vulnerable'. In an almost mechanical sense, these transformations in Latin America reflect both economic growth and declining inequality in over the period. We adopt a measure of mobility that decomposes the 'gainers' and 'losers' in society by social class of each household. The continent has experienced a large amount of churning over the last 15 years, at least 43% of all Latin Americans changed social classes between the mid 1990s and the end of the 2000s. Despite the upward mobility trend, intergenerational mobility, a better proxy for inequality of opportunity, remains stagnant. Educational achievement and attainment remain to be strongly dependent upon parental education levels. Despite the recent growth in pro-poor programs, the middle class has benefited disproportionately from social security transfers and are increasingly opting out from government services. Central to the region's prospects of continued progress will be its ability to harness the new middle class into a new, more inclusive social contract, where the better-off pay their fair share of taxes, and demand improved public services.

Superdiversity has rendered familiar places, groups and practices extraordinarily complex, and the traditional tools of analysis need rethinking. In this book, Jan Blommaert investigates his own neighbourhood in Antwerp, Belgium, from a complexity perspective. Using an innovative approach to linguistic landscaping, he demonstrates how multilingual signs can be read as chronicles documenting the complex histories of a place. The book can be read in many ways: as a theoretical and methodological contribution to the study of linguistic landscape; as one of the first monographs which addresses the sociolinguistics of superdiversity; or as a revision of some of the fundamental assumptions of social science through the use of chaos and complexity theory as an inspiration for understanding the structures of contemporary social life.

This textbook on elementary topology contains a detailed introduction to general topology and an introduction to algebraic topology via its most classical and elementary segment centered at the notions of fundamental group and covering space. The book is tailored for the reader who is determined to work actively. The proofs of theorems are separated from their formulations and are gathered at the end of each chapter. This makes the book look like a pure problem book and encourages the reader to think through each formulation. A reader who prefers a more traditional style can either find the proofs at the end of the chapter or skip them altogether. This style also caters to the expert who needs a handbook and prefers formulations not overshadowed by proofs. Most of the proofs are simple and easy to discover. The book can be useful and enjoyable for readers with quite different backgrounds and interests. The text is structured in such a way that it is

easy to determine what to expect from each piece and how to use it. There is core material, which makes up a relatively small part of the book. The core material is interspersed with examples, illustrative and training problems, and relevant discussions. The reader who has mastered the core material acquires a strong background in elementary topology and will feel at home in the environment of abstract mathematics. With almost no prerequisites (except real numbers), the book can serve as a text for a course on general and beginning algebraic topology.

Innovation is about change, and media products and services are changing. The processes of production and distribution of media are changing. The ownership and financing of media are changing. The roles of users are changing. And our ideas about media are changing. This book argues that innovation theory provides better tools for media researchers who wish to understand and explain current developments in the media landscape ? tools that not only allow them to see completely new things, but also to investigate aspects of new media that would otherwise not be as accessible. The various chapters of the book present selected studies that together illustrate how a more explicit focus on innovation and innovation theory can provide new insights into and generates knowledge about how media innovations develop, the sociocultural conditions of such innovations, the role of technology, and power relations in media developments.

In the practical real world a CPP may be a security manager, an external consultant, or a law enforcement agent. For purpose of the exam, however, you want to position yourself as a hired consultant - one who acts as an advisor to the company management. The company is your client, and you are helping it out. You advise, you guide, and you recommend. You need to understand your client. If your client is absolutely new to security, full scale interviews and statistical analysis on crimes may be necessary. However, if your client has a working security mechanism in place, then you should conduct assessment basing primarily on inputs from management. In other words, management determines the depth and scope of the security project. Management makes the decisions. You suggest ways to improve, then carry out the decisions made by management. You don't normally make decisions for your client. It is safe to say that you assume the role of project manager for your client's security project. The security project would start by discussing the scope of work with your client. The most important meeting between you and the client would be the initial goal setting and policy review meeting. Senior management is going to get involved, and you are going to act as the facilitator. From this meeting you become aware of the level of risk your client is willing to assume and accept. Your work would then start from there. When working on a project it is important to understand the background and operation of

the client. You also want to know what you are up against. Protection against vandalism is totally different from protection against terrorist attack. A CPP is more on the planning and management side of security. A security guard professional, on the other hand, is to provide client with professional protective services. It is believed that the CPP certification is more general in nature, while the PSP certification is way more specific and in-depth in physical security.
