Americans have always put the past to political ends. The Union laid claim to the Revolution--so did the Confederacy. Civil rights leaders said they were the true sons of liberty--so did Southern segregationists. This book tells the story of the centuries-long struggle over the meaning of the nation's founding, including the battle waged by the Tea Party, Glenn Beck, Sarah Palin, and evangelical Christians to "take back America." Jill Lepore, Harvard historian and New Yorker staff writer, offers a careful and concerned look at American history according to the far right, from the "rant heard round the world," which launched the Tea Party, to the Texas School Board's adoption of a social-studies curriculum that teaches that the United States was established as a Christian nation. Along the way, she provides rare insight into the eighteenth-century struggle for independence--a history of the Revolution, from the archives. Lepore traces the roots of the far right's reactionary history to the bicentennial in the 1970s, when no one could agree on what story a divided nation should tell about its unruly beginnings. Behind the Tea Party's Revolution, she argues, lies a nostalgic and even heartbreaking yearning for an imagined past--a time less troubled by ambiguity, strife, and uncertainty--a yearning for an America that never was. *The Whites of Their Eyes* reveals that the far right has embraced a narrative about America's founding that is not only a fable but is also, finally, a variety of fundamentalism--anti-intellectual, antihistorical, and

dangerously antipluralist. In a new afterword, Lepore addresses both the recent shift in Tea Party rhetoric from the Revolution to the Constitution and the diminished role of scholars as political commentators over the last half century of public debate.

A bestselling modern classic—both poignant and funny—about a boy with autism who sets out to solve the murder of a neighbor's dog and discovers unexpected truths about himself and the world. Nominated as one of America's best-loved novels by PBS's The Great American Read Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. He relates well to animals but has no understanding of human emotions. He cannot stand to be touched. And he detests the color yellow. This improbable story of Christopher's quest to investigate the suspicious death of a neighborhood dog makes for one of the most captivating, unusual, and widely heralded novels in recent years.

Teachers make a difference. The success of any plan for improving educational outcomes depends on the teachers who carry it out and thus on the abilities of those attracted to the field and their preparation. Yet there are many questions about how teachers are being prepared and how they ought to be prepared. Yet, teacher preparation is often treated as an afterthought in discussions of improving the public education system. *Preparing Teachers* addresses the issue of teacher preparation with specific attention to reading, mathematics, and science. The book evaluates the characteristics of the candidates who enter teacher preparation programs, the sorts of instruction and experiences teacher candidates receive in preparation programs, and the extent that the required instruction and experiences are consistent with converging scientific evidence. *Preparing Teachers* also identifies a need for a data collection model to provide valid and reliable information about the content knowledge, pedagogical competence, and effectiveness of graduates from the various kinds of teacher preparation programs. Federal and state policy makers need reliable, outcomes-based information to make sound decisions, and teacher educators need to know how best to contribute to the development of effective teachers. Clearer understanding of the content and character of effective teacher preparation is critical to improving it and to ensuring that the same critiques and questions are not being repeated 10 years from now.

While most children learn to read fairly well, there remain many young Americans whose futures are imperiled because they do not read well enough to meet the demands of our competitive, technology-driven society. This book explores the problem within the context of social, historical, cultural, and biological factors. Recommendations address the identification of groups of children at risk, effective instruction for the preschool and early grades, effective approaches to dialects and bilingualism, the importance of these findings for the professional development of teachers, and gaps that remain in our understanding of how children learn to read. Implications for parents, teachers, schools, communities, the media, and government at all levels are discussed. The book examines the epidemiology of reading problems and introduces the concepts used by experts in the field. In a clear and readable narrative, word identification, comprehension, and other processes in normal reading development are discussed. Against the background of normal progress, *Preventing Reading Difficulties in Young Children* examines factors that put children at risk of poor reading. It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades, including evaluation of philosophies, systems, and materials commonly used to teach reading.

This timely volume advocates pragmatic market socialism and offers a penetrating critique of the entire range of capitalist apologetics. As Yunker envisions it, market socialism would virtually duplicate the everyday economic functions of market capitalist economies, such as the United States', but with public ownership of large, established corporations, profits being distributed among the entire labor force. Pragmatic market socialism would be a means of enhancing economic justice and fairness without sacrificing the efficiency advantages of free enterprise and the market economy.

A reissue of the beautifully illustrated and authoritative biography of Frida Kahlo, publishing in time for a major London exhibition Frida is the story of one of the twentieth century's most extraordinary women, the painter Frida Kahlo. Born near Mexico City, she grew up during the turbulent days of the Mexican Revolution and, at eighteen, was the victim of an accident that left her crippled and unable to bear children. To salvage what she could from her unhappy situation, Kahlo had to learn to keep still – so she began to paint. Kahlo's unique talent was to make her one of the century's most enduring artists. But her remarkable paintings were only one element of a rich and dramatic life. Frida is also the story of her tempestuous marriage to the muralist Diego Rivera, her love affairs with numerous, diverse men such as Isamu Noguchi and Leon Trotsky, her involvement with the Communist Party, her absorption in Mexican folklore and culture, and of the inspiration behind her unforgettable art.

The Merchant of Venice has been performed more often than any other comedy by Shakespeare. Molly Mahood pays special attention to the expectations of the play's first audience, and to our modern experience of seeing and hearing the play. In a substantial new addition to the Introduction, Charles Edelman focuses on the play's sexual politics and recent scholarship devoted to the position of Jews in Shakespeare's time. He surveys the international scope and diversity of theatrical interpretations of The Merchant in the 1980s and 1990s and their different ways of tackling the troubling figure of Shylock.
