Housed on the campus of the University of Michigan in Ann Arbor, the University Musical Society is one of the oldest performing arts presenters in the country. A past recipient of the National Medal of Arts, the nation's highest public artistic honor, UMS connects audiences with wide-ranging performances in music, dance, and theater each season. Between 1987 and 2017, UMS was led by Ken Fischer, who over three decades pursued an ambitious campaign to expand and diversify the organization's programming and audiences—initiatives inspired by Fischer's overarching philosophy toward promoting the arts, "Everybody In, Nobody Out." The approach not only deepened UMS's engagement with the university and southeast Michigan communities, it led to exemplary partnerships with distinguished artists across the world. Under Fischer's leadership, UMS hosted numerous breakthrough performances, including the Vienna Philharmonic's final tour with Leonard Bernstein, appearances by then relatively unknown opera singer Cecilia Bartoli, a multiyear partnership with the Royal Shakespeare Company, and artists as diverse as Yo-Yo Ma, Jawole Willa Jo Zollar, Elizabeth Streb, and Nusrat Fateh Ali Khan. Though peppered with colorful anecdotes of how these successes came to be, this book is neither a history of UMS nor a memoir of Fischer's significant accomplishments with the organization. Rather it is a reflection on the power of the performing arts to engage and enrich communities—not by handing down cultural enrichment from on high, but by meeting communities where they live and helping them preserve cultural heritage, incubate talent, and find ways to make community voices heard.

"Reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor. Recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts, the Publications and Communications (P&C) Board of the American Psychological Association (APA) invited two task forces

of researchers to develop standards for reporting quantitative and qualitative research in journal articles. The Quantitative Journal Article Reporting Standards Working Group developed standards for quantitative research, and a separate book details those standards. This book discusses the reporting standards. It permits the space to expand on the ideas in those standards and to articulate the rationale behind each. It articulates decisions one may need to make as an author as one decides how to present their work. It also provides examples to illustrate a strong presentation style, and these can serve as helpful models. It provides the conceptual undergirding for the reporting decisions that authors make during the writing process. The book considers the typical sections of a qualitative research paper—the introductory sections, Method, Results, and Discussion. Guidance is provided for how to best present qualitative research, with rationales and illustrations. The book presents reporting standards for qualitative meta-analyses, which are integrative analyses of findings from across primary qualitative research. The book includes a discussion of objectivist and constructivist rhetorical styles in research reporting."--Preface. (PsycINFO Database Record (c) 2020 APA, all rights reserved).

Values and Ethics in Social Work Practice

The author of the world wide best-seller, *Small Is Beautiful*, now tackles the subject of Man, the World, and the Meaning of Living. Schumacher writes about man's relation to the world. man has obligations -- to other men, to the earth, to progress and technology, but most importantly himself. If man can fulfill these obligations, then and only then can he enjoy a real relationship with the world, then and only then can he know the meaning of living. Schumacher says we need maps: a "map

of knowledge" and a "map of living." The concern of the mapmaker--in this instance, Schumacher--is to find for everything its proper place. Things out of place tend to get lost; they become invisible and their proper places end to be filled by other things that ought not be there at all and therefore serve to mislead. A Guide for the Perplexed teaches us to be our own map makers. This constantly surprising, always stimulating book will be welcomed by a large audience, including the many new fans who believe strongly in what Schumacher has to say.

The book discusses the length, the functions and basic structure of abstracts, outlining a new approach to informative and indicative abstracts. Despite the relatively large number of textbooks on the topic there is no up-to-date book on abstracting in the English language. In addition to providing a comprehensive coverage of the topic, the proposed book contains novel views - especially on informative and indicative abstracts. The discussion is based on an interdisciplinary approach, blending the methods of library and information science and linguistics.
