We are delighted to welcome readers to the proceedings of the 6th Pacific-Rim Conference on Multimedia (PCM). The first PCM was held in Sydney, Australia, in 2000. Since then, it has been hosted successfully by Beijing, China, in 2001, Hsinchu, Taiwan, in 2002, Singapore in 2003, and Tokyo, Japan, in 2004, and finally Jeju, one of the most beautiful and fantastic islands in Korea. This year, we accepted 181 papers out of 570 submissions including regular and special session papers. The acceptance rate of 32% indicates our commitment to ensuring a very high-quality conference. This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers that provided timely and insightful reviews. We would therefore like to thank the Program Committee and all reviewers. The program of this year reflects the current interests of the PCM's. The accepted papers cover a range of topics, including, all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues. The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track. We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical.

There are so many great things you need to know about routines: they are predictable, they enable users to build up some good skills, they are quite comfortable and familiar as well. The Note 20 Ultra can be described as a huge phone that has a 6.9-inch screen. It's so big to the extent that, users would want to bring back that term "phablet" just to show an illustration about the phone. That's because the Note 20 Ultra is pretty large enough to cross some hazy line where it starts to feel just like a little tablet. The Note 20 Ultra's shows one of the most important hardware features is a promontory. This smartphone has a massive, mesa-like camera bump at the back of the phone, that holds the three different cameras, the laser focus sensor, as well as the flash. Camera bump aside is uniquely built, I don't think there is any company that currently designing the nicer phone hardware as perfect as Samsung. The Galaxy Note 20 is many persons' preferred phone hardware of the year currently.
