Old Radio Sets

While many facets of electronic projects construction have waxed and waned over the years, musical effects units have remained as popular as can be home constructed for much less than the cost of an equivalent ready-made product. Also, some of the more weird and wonderful effects units for the home constructor have no true commercial equivalents.

This overview of interactive videodisc technology is designed to assist educators in finding the appropriate equipment and software for any specific application. The handbook may also serve as a starting point for many educators who know nothing of the technology and assist them in deciding whether this technology is worth pursuing as an educational tool in specific situations. Although not comprehensive, the listings reflect a good portion of the videodisc-related products available today and the prices provide a good indication of the general price range of specific items. The handbook contains 10 chapters: (1) Introduction to Videodiscs; (2) Overview of Laser Disc Systems; (3) Selecting a Laser Videodisc Player; (4) Video Playback Units; (5) Videodisc Interface Units; (6) Disc Player Peripherals; (7) Videodisc System Packages; (8) Educational Videodisc Software; (9) Interactive Videodisc Authoring Languages; and (10) Videodisc Care and Maintenance. Appendices include directories of laser disc players; television monitors and projects; laser disc interfaces; laser disc peripherals; laser disc system packages; videodisc software (listed by subject area); videodisc mastering options; interactive authoring languages; service information; and videodisc resources, which includes a manufacturer's index. The radio has been part of home entertainment for over 75 years and generations of listeners have enjoyed their favorite music or programmes, or sat enthralled as an historic event unfolded through the radio's loudspeakers. This book explores the development of the radio from the late Victorian era until the late 1960s, including photographs of rare and unusual styles. A surprising number of early radios have survived to this day, some of which were made before broadcasting was introduced in the early 1920s, and the author discusses these old sets as well as the different and improving models over the years.

"This book marks a new milestone in the study of Chinese religious history. Only a scholar as intelligent and dedicated as Campany would dare tackle and so eloquently translate one of the most important and difficult works of early Chinese religious history."—Paul Katz, author of *Images of the Immortal: The Cult of Lu Dongbin at the Palace of Eternal Joy* "This is a pathbreaking work of lasting significance to the field of Chinese religious history. The scholarship is solid and current, drawing upon the best research from America, Europe, China, and Japan. The translation is accurate, clear, and elegant, based upon an innovative analysis

of surviving sources."—Terry Kleeman, author of *Great Perfection: Religion and Ethnicity in a Chinese Millennial Kingdom* "A competent translation of Ge Hong's hagiographies, with close attention paid to sources and editions, would already have constituted a major contribution to the field of Taoist studies. But Campany provides as well a survey of religious practices in Ge Hong's writings and a reading of the hagiographies which enables us to see the social practices that lie behind them. Together, these two works-in-one constitute the best available portrait of religion and society in early fourth-century China."—John Lagerwey, author of *Taoist Ritual in Chinese Society and History* "Campany's annotated translation of Ge Hong's (283-343) classic, the first in English, admirably captures the book's rich evocation of the religious culture of Southern China in the fourth century. Ge Hong here offers a series of case studies of what he regarded as the historical and exemplary evidence for the existence of immortals. This translation of *Traditions of Divine Transcendents* conveys a lively and multifaceted vision of the Taoist conception of physical immortality. The book's emphasis on practices related to the cult of the immortals and the hope for transcendence squarely places its subject in the religious life of traditional Chinese society."—Franciscus Verellen, co-editor of *The Taoist Canon: A Historical Guide*

Penned by the critic and curator Germano Celant to accompany an exhibition at Nigel Greenwood Gallery in London, it was the first critical consideration of the artist's book. A bibliography lists over 300 historic artist-produced publications from this golden age of the medium.

This book focuses on Luis Frois, a 16th-century Portuguese Jesuit and chronicler, who recorded his impressions of Japanese gardens, cities and building practices, tea-drinking rituals, Japan's unification efforts, cultural traditions, and the many differences between Europe and Japan in remarkable manuscripts almost lost to time. This research also draws on other Portuguese descriptions from contemporary sources spanning the years 1543 - 1597, later validated by Japanese history and iconography. Importantly, explorer Jorge Alvares recorded his experiences of discovery, prompting St. Francis Xavier to visit Japan in 1549, thus ushering in the "Christian Century" in Japan. During this long period of accord and reciprocal curiosity, the Portuguese wrote in excess of 1500 pages of letters to European Jesuits that detail their impressions of the island nation—not to mention their observations of powerful public figures such as Oda Nobunaga, Toyotomi Hideyoshi, and Sen no Rikyu. In addition to examining these letters, the authors

translated and researched early descriptions of 23 gardens in Kyoto and Nara and 9 important cities—later visited by the authors, sketched, photographed and compared with the imagery painted on 16th-century Japanese screens. However, the data gathered for this project was found mainly within five large volumes of Frois' *História do Japão* (2500 pages) and his *Treaty on Contradictions*—two incomparable anthropological works that were unpublished until the mid-20th century for reasons detailed herein. His volumes continue to be explored for their insightful observations of places, cultural practices, and the formidable historical figures with whom he interacted. Thus, this book examines the world's first globalization efforts that resulted in profitable commerce, the introduction of Portuguese firearms that changed Japan's history, scientific advances, religious expansion, and many artistic exchanges that have endured the centuries.

Modern TTL Circuits Manual provides an introduction to the basic principles of Transistor-Transistor Logic (TTL). This book outlines the major features of the 74 series of integrated circuits (ICs) and introduces the various sub-groups of the TTL family. Organized into seven chapters, this book begins with an overview of the basics of digital ICs. This text then examines the symbology and mathematics of digital logic. Other chapters consider a variety of topics, including waveform generator circuitry, clocked flip-flop and counter circuits, special counter/dividers, registers, data latches, comparators, and code converters. This book discusses as

well the most basic elements used in digital electronics. The final chapter deals with specialized types of IC, including decoders, multiplexers, demultiplexers, full-adders, addressable latches, rate multipliers, bus transceivers, and priority encoders. This book is a valuable resource for design engineers, technicians, and experimenters. Students of electronics will also find this book extremely useful.

Nature Across Cultures: Views of Nature and the Environment in Non-Western Cultures consists of about 25 essays dealing with the environmental knowledge and beliefs of cultures outside of the United States and Europe. In addition to articles surveying Islamic, Chinese, Native American, Aboriginal Australian, Indian, Thai, and Andean views of nature and the environment, among others, the book includes essays on Environmentalism and Images of the Other, Traditional Ecological Knowledge, Worldviews and Ecology, Rethinking the Western/non-Western Divide, and Landscape, Nature, and Culture. The essays address the connections between nature and culture and relate the environmental practices to the cultures which produced them. Each essay contains an extensive bibliography. Because the geographic range is global, the book fills a gap in both environmental history and in cultural studies. It should find a place on the bookshelves of advanced undergraduate students, graduate students, and scholars, as well as in libraries serving those groups.

High Fidelity

Taoism and Chinese Religion by Henri Maspero Translated by Frank A. Kierman, Jr. Revised Edition - Quirin Pinyin Updated Editions (QPUE) This book is a translation of *Le Taoisme et les Religions Chinoises*, which was posthumously published in France in 1971. It is the first English translation of most of the seminal works on Chinese religion of the great sinologist Henri Maspero. First released by The University of Massachusetts Press in 1981, this Quirin Press Revised Edition brings back into print this classic of Western sinology and offers the full original text with the following features: Older Wade-Giles transliteration fully updated and revised to Pinyin. Fully re-typeset and proofed for typographical errors and inconsistencies. Expanded index including Chinese characters. "It is largely thanks to [Maspero's] pioneer work in the fields of Chinese religion, anthropology, linguistics and history that China's contribution to the achievement of man could first be reviewed on terms of parity with those of other civilizations. "To the question whether his discoveries, opinions and interpretations have been outdated by the subsequent thirty years' research, it may be answered that leading scholars still rely with the utmost confidence on his writings as a framework whose validity has outdated their most recent findings, and whose detail has in many cases not been bettered." -Michael Loewe, University of Cambridge (from the sleeve-note to the original 1981 edition) Maspero (1883-1945) was the first Western scholar to study the vast and recondite compendium of Daoist writing, the *Daozang*, and explore its historic meaning. The first part of the book closely examines Chinese society, religion, and folk-myth; the second part specifically focuses on the practice and form of Daoism and includes an extensive investigation of yoga-like procedures of nutrition, breathing exercises, and sexual techniques-all designed to ensure personal immortality in ancient Daoism. The titles of the nine "books" comprising this study give an indication of its breadth and variety: *Chinese Religion in Its Historical Development*; *The Mythology of Modern China*; *The Society and Religion of the Ancient Chinese and of the Modern Tai*; *How Was Buddhism Introduced into China?*; *Daoism in Chinese Religious Beliefs of the Six Dynasties Period*; *The Poet Xi Kang and the Club of Seven Sages of the Bamboo Grove*; *An Essay on Daoism in the First Centuries CE*; *How to Communicate with the Daoist Gods*; *Methods of "Nourishing the Vital Principle" in the Ancient Daoist Religion*.
