Every day, billions of photographs, news stories, songs, X-rays, TV shows, phone calls, and emails are being scattered around the world as sequences of zeroes and ones: bits. We can't escape this explosion of digital information and few of us want to-the benefits are too seductive. The technology has enabled unprecedented innovation, collaboration, entertainment, and democratic participation. But the same engineering marvels are shattering centuries-old assumptions about privacy, identity, free

expression, and personal control as more and more details of our lives are captured as digital data. Can you control who sees all that personal information about you? Can email be truly confidential, when nothing seems to be private? Shouldn't the Internet be censored the way radio and TV are? is it really a federal crime to download music? When you use Google or Yahoo! to search for something, how do they decide which sites to show you? Do you still have free speech in the digital world? Do you have a voice in shaping government or corporate policies about any of this? Blown to Bits offers provocative answers to these questions and tells intriguing real-life stories. This book is a wake-up call To The human consequences of the digital explosion.

Someday we may say that we never saw it coming. After seventy-five years of peace in the Pacific, a new challenger to American power has emerged, on a scale not seen in generations. Working from a deep sense of national destiny, the Chinese Communist Party is guiding a country of 1.4 billion people towards what it calls "the great rejuvenation of the Chinese nation," and, with it, the end of an American-led world. Will this generation witness the final act for America as a superpower? Can American ingenuity, confidence, and will power outcompete the long-term strategic thinking and planning of China's Communist Party? These are the challenges that will shape the

next decade and more. China's Vision of Victory brings the reader to a new understanding of China's planning, strategy, and ambitions. From seabed to space, from Africa to the Arctic, from subsurface warfare to the rise of China's global corporations, this book will illuminate for the reader the new great game of our lifetimes, and how our adversary sees it all.
