This book serves as a reference for researchers and designers in Embedded Systems who need to explore design alternatives. It provides a design space exploration methodology for the analysis of system characteristics and the selection of the most appropriate architectural solution to satisfy requirements in terms of performance, power consumption, number of required resources, etc. Coverage focuses on the design of complex multimedia applications, where the choice of the optimal design alternative in terms of application/architecture pair is too complex to be pursued through a full search comparison, especially because of the multi-objective nature of the designer's goal, the simulation time required and the number of parameters of the multi-core architecture to be optimized concurrently.

YOU DESERVE TO HAVE POWER. IT IS YOURS FOR THE TAKING. GENE SIMMONS IS HERE TO UNLOCK THE DOORS TO THE TEMPLE. Gene Simmons, KISS front-man, multi-hyphenate entrepreneur, and master of self-invention, shares his philosophy on power—how to attain it, how to keep it, and how to harness it as a driving force in business and in life. As co-founder of KISS, America's #1 gold record-award-winning group of all time, Simmons knows the thrill and seduction of power firsthand. But gold records alone don't equal power. The decisions you make once you attain a certain level of success are what separate the pretenders from the pantheon. Inspired by Niccolo Machiavelli's *The Prince*, Simmons offers his unique take on the dynamics of power in every realm of life, from the bedroom to the boardroom, to the world of rock, celebrity, and social media, to politics. With one-of-a-kind anecdotes from his life and career, as well as stories from historical and contemporary masters of power, including Winston Churchill, Napoleon Bonaparte, Warren Buffett, Michael Jordon, Oprah, and Elon Musk, Simmons crafts a persuasive and provocative theory on how the pursuit of power drives civilization and defines our lives. The rules of power are changing in today's fast-paced, hyper-connected world in a way that Machiavelli never could have imagined, and we all need to learn to adapt. Simmons tells readers: Ignore the negatives. Be unrelenting. Rise above the rest. You are the architect of your success.

Confronting Reality will change the way you think about and run your business. It is the first book that shows how to connect the big picture of the new era of business with the nitty-gritty of what to do about it. Through a completely new way to understand and use the business model as the primary tool for confronting reality—a breakthrough that will become the management innovation of this decade—you'll know sooner rather than later whether your fundamental business premise is under assault, where your best opportunities lie, what you should change and what you should leave alone, and how to realistically plan the future of your business. The fundamentals of how a business makes money are being rapidly and permanently altered by sweeping structural changes. With their extraordinary depth and breadth of experience, Larry Bossidy and Ram Charan are the ideal guides for everyone—entrepreneur, mid-level manager, or CEO—about what is to be done so you can get things right in this challenging, radically changed world. They start by showing you how to understand

the most fundamental element of any business: whether you can realistically make the money you hope to in the game you're playing. Bossidy and Charan show how to use the business model to develop a robust, reality-based process for thinking about the specifics of your business in a holistic way. They show how to tie together the financial targets you must meet, the external realities you face, and internal activities such as strategy development, operating tactics, and selection and development of people. Through the lens of the business model, as well as the skillful use of initiatives and development of people with the right leadership characteristics, you'll see how Robert Nardelli at Home Depot, Jim McNerney at 3M, Dick Harrington at the Thomson Corporation, Michael Wisbrun at KLM, Joseph Tucci at EMC, and John Chambers at Cisco confronted reality. Whether they faced crisis or opportunity, all made the right kinds of changes through a combination of business savvy (the art of understanding the fundamentals driving a business) and business model thinking.

This workbook is a review or refresher course on the virtues given to us by God. To live well is nothing other than to love God with all one's heart, with all one's soul and with all one's efforts; from this it comes about that love is kept whole and uncorrupted (through temperance). No misfortune can disturb it (and this is fortitude). It obeys only [God] (and this is justice), and is careful in discerning things, so as not to be surprised by deceit or trickery (and this is prudence).

"An intriguing dark psychological thriller—truly brilliant!" --Lisa Jackson A stunning, wonderfully assured psychological thriller that evokes Gillian Flynn and Alice Sebold, *The Bones of You* revolves around a young girl's murder and one

woman's obsession with uncovering the secrets in an idyllic English village. I have a gardener's inherent belief in the natural order of things. Soft-petalled flowers that go to seed. The resolute passage of the seasons. Swallows that fly thousands of miles to follow the eternal summer. Children who don't die before their parents. When Kate receives a phone call with news that Rosie Anderson is missing, she's stunned and disturbed. Rosie is eighteen, the same age as Kate's daughter, and a beautiful, quiet, and kind young woman. Though the locals are optimistic—girls like Rosie don't get into real trouble—Kate's sense of foreboding is confirmed when Rosie is found fatally beaten and stabbed. Who would kill the perfect daughter, from the perfect family? Yet the more Kate entwines herself with the Andersons—graceful mother Jo, renowned journalist father Neal, watchful younger sister Delphine—the more she is convinced that not everything is as it seems. Anonymous notes arrive, urging Kate to unravel the tangled threads of Rosie's life and death, though she has no idea where they will lead. Weaving flashbacks from Rosie's perspective into a tautly plotted narrative, *The Bones of You* is a gripping, haunting novel of sacrifices and lies, desperation and love. "In British author Howells's suspenseful and poignant debut the increasingly tense storytelling and astute observations on mother-daughter relationships will keep readers turning the pages." -Publishers Weekly

Being emotionally independent does not mean that you have to stop being loving, It is about being the master of your own feelings, faithful to your own principles and never handing over your personal dignity to someone else in exchange for something, not even in the name of love. Do I love or do I depend? If this is a question you ask yourself, then this guide, based on the bestseller, To Love or to Depend? is for you. In it, Walter Riso teaches us, in a practical manner and without too much theory involved, the steps we need to take in order to be able to love without being emotionally dependent. He provides ideas and processes that will help you develop the right skills to deal with emotional dependency, prevent it and/or create a lifestyle aimed at emotional independence and affective detachment.

Whether visitors or not, all citizens own public land and its associated resources Professional, responsive, and carefully considered planning is critical to success in developing, managing, and making accessible outdoor recreation resources. Outdoor Recreation Planning provides guidance for defining where outdoor recreation resource management should and

could be going forward and sound advice, principles, and approaches for identifying pathways for getting there. Responsive outdoor recreation resource planning must actively and interactively engage, early and often, the stakeholders, citizens, and others the planning organization is working to serve. Considered planning will look carefully and comprehensively at the opportunities and constraints for achieving success. Outdoor Recreation Planning is unique because it has been prepared by academics and planning practitioners working together to provide a teaching guide as well as a planning applications resource. The authors have practical experience in advising and helping to develop recreation resource planning rules and procedures and in developing master plans for public properties. It is a must read for anyone interested in learning about, protecting, managing, and planning for public outdoor recreation resources.
