A family is hunted by a centuries-old monster: a man with a relentless obsession who can take on any identity. The String Diaries opens with Hannah frantically driving through the night--her daughter asleep in the back, her husband bleeding out in the seat beside her. In the trunk of the car rests a cache of diaries dating back 200 years, tied and retied with strings through generations. The diaries carry the rules for survival that have been handed down from mother to daughter since the 19th century. But how can Hannah escape an enemy with the ability to look and sound like the people she loves? Stephen Lloyd Jones's debut novel is a sweeping thriller that extends from the present day, to Oxford in the 1970s, to Hungary at the turn of the 19th century, all tracing back to a man from an ancient royal family with a consuming passion--a boy who can change his shape, insert himself into the intimate lives of his victims, and destroy them. If Hannah fails to end the chase now, her daughter is next in line. Only Hannah can decide how much she is willing to sacrifice to finally put a centuries-old curse to rest.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

The Circus Spektakulär is proud to present Jack McCabe: Fire-breather, knife-thrower, risk-taker. My house burned down when I was just a boy, robbing me of both my parents. Now I breathe fire, eat the poison that almost killed me. Crowds come to see me night after night. Men for the spectacle, women for the thrill. I'm an oddity to be stared at and desired. With each flame I spit, I risk my life. I wear scars on my body that will never go away, but the scars inside my head are far more difficult to overlook. My brother doesn't know me, and if I have it my way he never will. Life was going exactly the way I'd planned until Lille came along. She wanted to run away with the circus, have an adventure, but this world was never meant for her. I try to keep her safe, because she doesn't know the dangers that are out here on the road. She doesn't know the monsters that lurk behind the bright lights of the ring. In truth, I could be considered one of them. We were fashioned from different cloths, never intended to mix. So I watch her. I try not to touch, even when her eyes invite me. Join us in the Spiegeltent and let us give you a show. Allow my Lille to draw a picture for you in paint and sweat and skin. The truest love is always the hardest to let in.

The first ten lies they tell you in high school. "Speak up for yourself--we want to know what you have to say." From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless, outcast, because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. As time passes, she becomes increasingly isolated and practically stops talking altogether. Only her art class offers any solace, and it is through her work on an art project that she is finally able to face what really happened at that terrible party: she was raped by an upperclassman, a guy who still attends Merryweather and is still a threat to her. Her healing process has just begun when she has another violent encounter with him. But this time Melinda fights back, refuses to be silent, and thereby achieves a measure of vindication. In Laurie Halse Anderson's powerful novel, an utterly believable heroine with a bitterly ironic voice delivers a blow to the hypocritical world of high school. She speaks for many a disenfranchised teenager while demonstrating the importance of speaking up for oneself. *Speak* was a 1999 National Book Award Finalist for Young People's Literature.

The mother of an autistic child, Braxton long feared that her son's condition might be karmic retribution for earlier life choices, some of which will shock fans. Proofs from THE BOOK

This memoir is not your traditional story-told-in-words, although there are gripping excerpts that recount a midnight shooting and the dreams that foretold it, as well as interviews that introduce in depth the painter/poet, subject of the book, and explore her post-trauma road to recovery. Nor is it your average book of paintings, although there are over sixty paintings, prints, and cartoons to peruse. The paintings, like the memoir passages, grip the viewer with great intensity; they are mostly portraits, the kind that do not just represent but bring the viewer into the living presence of a soul, like those by Rembrandt or Van Gogh. Schavrien paints in that tradition, bringing psychological and spiritual insights to her readings of the many types around her, from intimates to café denizens, by way of her decades as a psychotherapist. This is a book which restores one's faith in creativity-its boundless power to bring resurrection in the face of death. Schavrien, student and friend of the late Harold Rosenberg, art critic for *The New Yorker*, has been recognized through nomination as Oakland, California artist of the year. She has received 15 national and international prizes in the arts. "Judy Schavrien's

Compilers and operating systems constitute the basic interfaces between a programmer and the machine for which he is developing software. In this book we are concerned with the construction of the former. Our intent is to provide the reader with a firm theoretical basis for compiler construction and sound engineering principles for selecting alternate methods, implementing them, and integrating them into a reliable, economically viable product. The emphasis is upon a clean decomposition employing modules that can be re-used for many compilers, separation of concerns to facilitate team programming, and flexibility to accommodate hardware and system constraints. A reader should be able to understand the questions he must ask when designing a compiler for language X on machine Y, what tradeoffs are possible, and what performance might be obtained. He should not feel that any part of the design rests on whim; each decision must be based upon specific, identifiable characteristics of the source and target languages or upon design goals of the compiler. The vast majority of computer professionals will never write a compiler. Nevertheless, study of compiler technology provides important benefits for almost everyone in the field . • It focuses attention on the basic relationships between languages and machines. Understanding of these relationships eases the inevitable transitions to new hardware and programming languages and improves a person's ability to make appropriate tradeoffs in design and implementation .
