Document 1

The book focuses on the integration of intelligent communication systems, control systems, and devices related to all aspects of engineering and sciences. It contains high-quality research papers presented at the 2nd international conference, ICICCD 2017, organized by the Department of Electronics, Instrumentation and Control Engineering of University of Petroleum and Energy Studies, Dehradun on 15 and 16 April, 2017. The volume broadly covers recent advances of intelligent communication, intelligent control and intelligent devices. The work presented in this book is original research work, findings and practical development experiences of researchers, academicians, scientists and industrial practitioners.

Meanwhile in Dopamine City

This book introduces research presented at the “International Conference on Artificial Intelligence: Advances and Applications-2019 (ICAIAA 2019),” a two-day conference and workshop bringing together leading academicians, researchers as well as students to share their experiences and findings on all aspects of engineering applications of artificial intelligence. The book covers research in the areas of artificial intelligence, machine learning, and deep learning applications in health care, agriculture, business and security. It also includes research in core concepts of computer networks, intelligent system design and deployment, real-time systems, WSN, sensors and sensor nodes, SDN and NFV. As such it is a valuable resource for students, academics and practitioners in industry working on AI applications.

The INA Trial and the Raj

This book, first of its kind, combination of concise explanations and focused clinical information satisfies the needs of practicing radiologists, neurologists, neurosurgeons, plastic and other peripheral nerve surgeons in need of a handy

reference and technologists performing MRN studies. Written by two experts of magnetic resonance neurography (MRN) practitioners and educators, this thoroughly illustrated resource delivers how the information you need to perform and interpret peripheral nerve MR imaging studies with confidence. Concise descriptions and high quality illustrations combined wit.

Stand by Me

Along Cornwall's ancient coast, the flotsam and jetsam of the past becomes caught in the cross-currents of the present and, from time to time, a certain kind of magic can float to the surface. Straying husbands lured into the sea can be fetched back, for a fee. Magpies whisper to lonely drivers late at night. Trees can make wishes come true - provided you know how to wish properly first. Houses creak, fill with water and keep a fretful watch on their inhabitants, straightening shower curtains and worrying about frayed carpets. A teenager's growing pains are sometimes even bigger than him. And, on a windy beach, a small boy and his grandmother keep despair at bay with an old white door. In these stories, Cornish folklore slips into everyday life. Hopes, regrets and memories are entangled with catfish, wrecker's lamps, standing stones and baying hounds, and relationships wax and wane in the glow of a moonlit sea. This luminous, startling and utterly spellbinding debut collection introduces in Lucy Wood a spectacular new voice in contemporary British fiction.

Iris Grace

The book covers different aspects of real-world applications of optimization algorithms. It provides insights from the Fourth International Conference on Harmony Search, Soft Computing and Applications held at BML Munjal University, Gurgaon, India on February 7-9, 2018. It consists of research articles on novel and newly proposed optimization algorithms; the theoretical study of nature-inspired optimization algorithms; numerically established results of nature-inspired optimization algorithms; and real-world applications of optimization algorithms and synthetic benchmarking of optimization algorithms.

COPYRIGHT ACT & RELATED LAWS

A literary crime masterpiece that follows a Japanese pickpocket lost to the machinations of fate. Bleak and oozing existential dread, *The Thief* is simply unforgettable. The Thief is a seasoned pickpocket. Anonymous in his tailored suit, he weaves in and out of Tokyo crowds, stealing wallets from strangers so smoothly sometimes he doesn't even remember the snatch. Most people are just a blur to him, nameless faces from whom he chooses his victims. He has no family, no friends, no connections. But he does have a past, which finally catches up with him when Ishikawa, his first partner, reappears in his life, and offers him a job he can't refuse. It's an easy job: tie up an old rich man, steal the contents of the safe. No one gets hurt. Only the day after the job does he learn that the old man was a prominent politician, and that he was brutally killed after the robbery. And now the Thief is caught in a tangle even he might not be able to escape.

Physiology of the Ear

The arrival of photography in India in 1840 began a rivalry between its practitioners and the painters of traditional miniatures and portraits. The novelty of this astonishing new medium soon attracted many court painters and patrons who themselves turned photographers, including the Maharajas of Jaipur, Tripura and Chamba. These early photographs captured Indian rulers and their families in a variety of poses, which nevertheless reflected the formality and constraints of court life. This fascinating collection features a wide range of photographs - based on previously unpublished archives - that explores early Indian photography, and more specifically portraiture throughout the subcontinent. This remarkable and beautifully presented historical work sheds new light on the relationship between photographers, painters and their patrons in the nineteenth and twentieth centuries. With a foreword by H.R.H. Shriji Arvind Singh Mewar of Udaipur, *Royal Indian Portraits: Posing for Posterity* will be a valuable resource both for connoisseurs of early photography and for those interested in the history of India.

The History of Indian Art

This gripping detective thriller set in a fascinating but corrupt country has all the drama, passion and tenderness of the Argentinian tango. It is December 2001, and Argentina is in economic meltdown. While the country wallows in corruption, cynicism and indifference, Gotan, an ex-cop from the Federal Police, lives in the past. He cannot forget the beguiling woman who briefly set alight his life--she disappeared as soon as he revealed he had worked for the "National Shame." Gotan is called urgently late one night to a friend's coastal retreat. He arrives too late: his friend is dead and his girlfriend has vanished. Using all his resources to find the girl, Gotan finds himself embroiled in a plot that goes to the heart of Argentina itself. Though no longer part of the force, Gotan is still a cop by nature. But his is a dangerous undertaking: after all, no one loves a policeman.

The Soddit

At a time when society is demanding accountability from the medical education system and residency review committees are demanding written curricula, this book offers a practical, yet theoretically sound, approach to curriculum development in medicine. Short, practical, and generic in its approach, the book begins with an overview of a six-step approach to curriculum development. Each succeeding chapter then covers one of the six steps: problem identification, targeted needs assessment, goals and objectives, education methods, implementation, and evaluation. Additional chapters address curriculum

maintenance, enhancement, and dissemination. Throughout, examples are used to illustrate major points. An appendix provides the reader with a selected list of published and unpublished resources on funding, faculty development, and already developed curricula.

Proceeding of International Conference on Intelligent Communication, Control and Devices

Advances in Computing and Data Sciences

This book presents QuickTest Professional 10 in an easy to understand concepts with real-time examples and illustrations. This guide walks you through the step by step process of setting up your automation scripts to test any kind of application. Also, provided are the most commonly used functions and best practices followed in the industry. All the concepts are explained in plain words for easy understanding and the guide also has the most commonly asked interview questions and answers to them. This guide is for the job aspirants who are looking for QTP jobs and it will also help them to get started in the right direction when they get into job.

No One Loves a Policeman

Posing for Posterity

As in thought he passes backward into time, the country becomes quieter, and it seems to grow larger. The sounds of engines become less frequent and farther apart until they cease altogether. On a clear Kentucky night in 1888, a young woman risks her life to save a stranger from a drunken mob. Almost a hundred years later, her great-grandson Andy climbs a hill at the edge of town, and is flooded with memories of all he has lived, seen and heard of the past century of neighbourly feuds and family secrets; of grief and betrayal - and of great friendship that endures for a lifetime. Wendell Berry unravels the story of a town over the course of four generations, lovingly chronicling the intertwined lives of the families who call it home. Affectionate, elegiac and wry, these uplifting rural fables invite us to witness the beauty and quiet heroism at the heart of each ordinary, interconnected life.

Hitting Trees with Sticks

****Long-listed for the 2013 Frank O'Connor International Short Story Prize**** ****Short-listed for the 2013 Edge Hill Short Story Prize**** A young textile designer quits Britain to work for a Nigerian women's refuge, confident that this is her one chance to make a difference... A sixteen-year-old uses his first job, as a window-cleaner, to peer into other people's lives and carefully plan his own... A leading scientist spends an evening trying to explain his latest theory to a man who could destroy him The characters in Jane Rogers' first short story collection are each blessed with an unwavering conviction. Buoyed up on self-belief, they enthuse, take calculated

risks, and refuse to be deterred by the odds stacked against them. But just as Rogers' compassion as a writer endears us to their cause, her keen eye shows how fine the balance can be between conviction and self-delusion. At times, her subject seems to be the fallibility of any point of view, the persistence of blind spots no matter how careful or intelligent the viewer. Hers are not unreliable narrators, merely human ones – diverse, contradictory, imperfect. Indeed it is often their flaws that beguile us. 'There is nothing predictable about a Jane Rogers story. She has the confidence and skill to inhabit many different voices and different worlds. She slides the reader, in imagination, to a snow-bound France, to Africa, to the Caribbean: she takes us into offices and libraries, under the sea and into the forest, and also into the vast untrodden country of memory that we carry around inside. Her observation of our species is tender, precise, illuminating.' – Hilary Mantel 'Thrilling, ambitious stories that cross continents and soar from cells to stars.' – Maggie Gee 'Warm, wise, insightful, sharply observed and beautifully written – each story is a world in microcosm.' – Marina Lewycka 'This is her first collection of short stories, and it is beautiful.' - The Independent on Sunday

Diving Belles

FROM THE BOOKER PRIZE-WINNING AUTHOR OF VERNON GOD LITTLE 'Pierre's high-risk prose explores and expands the cartoonish, taboo-busting outer edges of literary possibility.' -- Independent *** It's a big bad world out there, in Dopamine City. All Lonnie Cush wants is to keep his kids safe. But Shelby-Ann - his little girl, the maddening apple of his eye - has other ideas: Shelby-Ann wants her first smartphone. So new realities are rocketing their way to 37 Palisade Row, where everything will change, every day, and at mortal speed. Until Lonnie finds himself in a stitch: he'll have to join this new world, or wither in it. Or can he mastermind a vanishing act? The story of a hapless father's love and loss, and a speedball, starburst satire, Meanwhile in Dopamine City is a passionate, freewheeling work from the winner of the Booker Prize: a riotous cry for the soul and the flesh and the heart in the cooling bathwater of our automatic times.

Villa Triste

An uncanny, startlingly beautiful story collection steeped in the Cornish landscape, from the award-winning author of Diving Belles and Other Stories and Weathering. At the very edge of England, where the Atlantic Ocean meets the land and visitors flock in with the summer like seagulls, there is a Cornwall that is not shown on postcards. It is a place where communication cables buzz deep beneath the sand; where satellite dishes turn like flowers on clifftops, and where people drift like flotsam, caught in eddying tides. Restless children haunt empty holiday homes, a surfer struggles with the undertow of family life, a girl watches her childhood spin away from her in the whirl of a night-time fairground and, in a web of sea caves, a brother and sister search the dark for something lost. These astonishing, beguiling stories of ghosts and shifting sands, of static caravans and shipwrecked cargo, explore notions of landscape and belonging, permanence and impermanence, and the way places can take hold and never quite let go.

Embedded Computer Vision

One of the world's leading authorities in spinal cord injury, and a participant in the Human Brain Project brings you an evidenced-based guide to the state-of-the-art in spinal cord rehabilitation. She has assembled an expert team of clinicians, each with expertise in the content areas they address. Their work encompasses all of the new scientific knowledge and technological advances practitioners need to know to determine the most effective rehabilitation interventions for each patient and to attain maximum restoration of function in individuals with SCI.

Magnetic Resonance Neurography

History of India

This book constitutes the refereed proceedings of the First International Conference on Advances in Computing and Data Sciences, ICACDS 2016, held in Ghaziabad, India, in November 2016. The 64 full papers were carefully reviewed and selected from 502 submissions. The papers are organized in topical sections on Advanced Computing; Communications; Informatics; Internet of Things; Data Sciences.

Transplantation Immunology

Despite the burgeoning body of knowledge specific to toxic stress, medical trauma and maternal separation, the delivery of developmentally supportive, neuroprotective care for hospitalized infants is inconsistent at best. Bedside clinicians struggle to integrate evidence-based best practices in neurodevelopmental care. Challenges include competing priorities, knowledge gaps, staffing demands, access to appropriate therapeutic resources, and documentation limitations. This book addresses these challenges in a thoughtful, comprehensive and practical way. The author provides evidence-based strategies and resources to improve not only the quality of the neurodevelopmentally supportive care provided but, also the consistency and coherence in which the care is documented. Clear, concise, comprehensive documentation has been proven to positively impact patient outcomes, The INDIA EBUS platform, a forward thinking, trans-disciplinary interface for improved documentation, opens the door for future innovations in digital platforms and artificial intelligence that improve the delivery of safe, high quality, patient-focused healthcare. Mary Coughlin, MS, NNP, RNC-EPresident and Founder, Caring Essentials Collaborative, LLC Boston, MA USA Preterm babies are at high risk for developmental disability and to large extent a lifelong problem. Presently the national programs are aimed at reducing mortality and is successful to considerable extent. But this is increasing the morbidity of academic, cognitive, behavioral, social, communication and other developmental problems. In this context there is an urgent need to protect the brain at the earliest. But in terms of developmental care there are many lacunae in the present infrastructure and some of them are oEmphasis on or reliance on post discharge intervention for supporting the developmentoNon individualized (mainly based on behavioral assessment) developmental care in Neonatal Intensive Care Unit (NICU)oNo standardization or policy for developmental care olack of documentation for developmental care or it is time laboriousoLow level of evidence

for management of neurodevelopmental care. Lack of enough trained manpower mainly Neonatal Therapist. Individual component practice preferred over comprehensive management for developmental care though bundle care approach is found to be effective. and many other. Considering all these, INDIA EBUS is developed. INDIA EBUS is designed for protecting brain at the earliest for better performance throughout life. INDIA is an acronym for Individual New-born Developmental Intervention Application. EBUS stands for Evidence Based and Ultra SMART (Specific, Measurable, Accountable, Realistic solutions for Timely intervention). The main feature of INDIA EBUS is all the strategies suggested are evidence based which is a cornerstone of specialty care. Another key element of this is all the components are measurable and you will get a score for each developmentally supportive intervention. Rather than relying on the post discharge developmental intervention you can begin the early intervention during acute care. Mission Statement of INDIA EBUS: INDIA EBUS is dedicated to the highest quality of ultra-early intervention delivered with trust, thoughtfulness and care. Nandgaonkar Hemant Assistant Professor, Occupational Therapy Training School & Centre, Seth GS Medical College, KEM Hospital, Mumbai, INDIA. <http://therapyconcepts.org/>

Intelligent Communication, Control and Devices

A lucid and exemplary introduction to Indian labour laws and a thorough discussion on the legislations dealing with industrial relations and labour issues. Aiming to provide the readers with an understanding and knowledge of labour laws, this textbook presents a collection of legislations dealing with industrial relations, wages, work conditions, and social security, and legislations regulating the employment of women and children in industrial activities. It focuses on the application of labour laws to and within businesses, and deals with legal postulations from the perspective of a manager. By including a number of relevant cases and caselets highlighting various labour issues of industrial units across the country, Industrial Relations and Labour Laws for Managers helps students of human resource management as well as HR professionals to understand the legal implications in a relatable way. Key Features • Comprehensive coverage of labour and industrial relations laws along with contemporary developments • Each act supported by carefully curated cases to exemplify the practical facets and their implications • Each case followed by judgement and explanation unveiling the application of the legal concept • Each chapter aided by objective and descriptive exercises and case-based questions to aid teaching and learning in a classroom situation

Spinal Cord Injury Rehabilitation

QuickTest Professional Unplugged

Technical innovations in the laboratory over the past ten years have greatly improved our understanding of the immunological mechanisms of transplanted organ rejection. In Transplantation Immunology: Methods and Protocols, leading experts in solid organ transplantation review the current status of the field and

describe cutting-edge techniques for detecting the immune response to the allografted organ. The authors present the latest techniques for HLA typing, detecting HLA antibodies, and monitoring T-cell response, and examine more specialized methods of utilizing proteomics, laser dissection microscopy, and real-time polymerase chain reaction. The areas of tolerance induction and reprogramming of the immune system are also covered, along with a discussion of up-to-date methods of organ preservation, of today's optimal immunosuppressive drug regimens, as well as the difficulty of mimicking chronic rejection in experimental models. Introductory chapters provide a theoretical update on current practices in renal, liver, islet, and lung transplantation and on the pathways of antigen presentation and chronic rejection. State of the art and highly practical, Transplantation Immunology: Methods and Protocols illuminates for clinicians and scientists-both newcomers and experts-the new world of detecting and monitoring patients' immunological responses to solid organ transplantation.

Nona's Room

Winner:Premio Nacional de Narrativa (2016)Premio de la Critica Española (2016)Premio Dulce Chacón (2016) Book of the Year 2015:La Vanguardia, El Cultural, Babelia and ABC An award-winning collection of Gothic and uncanny stories from one of Europe's most celebrated contemporary writers of short fiction. In Nona's Room the everyday fantasies of women slowly turn into nightmare, delusion and paranoia. A young girl who is envious of the attention given to her sister has a brutal awakening. A young woman, facing eviction, misplaces her trust in an old lady who invites her into her home. A mature woman spends the night in a hotel in Madrid and falls into a time warp Cubas's stories are suffused with the chilling tones of Angela Carter's The Bloody Chamber and the psychological intensity of Paula Hawkins's The Girl on the Train.

State of Medical practice: India

QuickTest Professional Unplugged, the first book written by author Tarun Lalwani and the first ever book on QTP as well, has already turned out a bestseller since its publication in 2009. Tarun Lalwani has won the Best Automation Book award in 2nd ATI Automation honors for the sameThis book is good for those starting out a career in Testing Automation or even for those with few years of QTP experience. It is the culmination of 3 years of research and effort in this field.The book gives a pragmatic view of using QTP in various situations. And is recommended for those aspiring to be experts or advanced users of QTPQTP Unplugged 2nd Edition comes with all the updates till QTP 11 in a new chapter and few minor fixes in the code. The new chapter covers many features that got added over the previous version of QTP. The chapter also discusses the Object Repository feature in details which had seen a major change from QTP 8.X to QTP 9Quotes from the Reviewers“I find this to be a very pragmatic, hand's on book for those who want to extend their QTP skills beyond basic expert view programming. This book is written by a QTP master for those who wish to eventually become masters themselves.” - Terry“Tarun Lalwani has singlehandedly helped thousands of people to expand their knowledge of QuickTest Professional. Here is a book the automated testing community has been crying-out for. This book will help QTP practitioners, from beginner to expert. I have used QTP from V6.0 and during the review I learnt something from every

chapter.” – Mark

International Conference on Artificial Intelligence: Advances and Applications 2019

The Housing Lark

Iris Grace is a beautiful little girl who, from a very young age, barely communicated, avoided social interaction with other people, and rarely smiled. From both before her diagnosis of autism and after, she seemed trapped in her own world, unable to connect with those around her. One day, her mother brought home a Maine Coon kitten for Iris, even though cats aren't typically thought of as therapy pets. Thula, named after one of Iris's favorite African lullabies and meaning "peace" in Zulu, immediately bonded with Iris. Thula knew right away how to assuage Iris when she became overstimulated; when to intervene when Iris became overwhelmed; and how to provide distraction when Iris started heading toward a meltdown. Whether exploring, playing, sleeping, or taking a bath with Iris or accompanying the family on a bike ride, Thula became so much more than a therapy cat. With Thula's safe companionship, Iris began to talk and interact with her family. This heartwarming story is illustrated with sixty of Iris's gorgeous impressionistic paintings, works of art that have allowed her to express herself since the age of three. A gifted artist, Iris sees the natural world in a profoundly vivid and visceral way. With Thula by her side, she'll sit and paint for hours, and the results are stunning. Inspiring and touching, Iris Grace follows the struggles and triumphs of a family—and a miracle cat—as they learn to connect with an amazing child.

India Ebus

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. We have represented this book in the same form as it was first published. Hence any marks seen are left intentionally to preserve its true nature.

Harmony Search and Nature Inspired Optimization Algorithms

As a graduate student at Ohio State in the mid-1970s, I inherited a unique computer vision laboratory from the doctoral research of previous students. They had designed and built an early frame-grabber to deliver digitized color video from a (very large) electronic video camera on a tripod to a mini-computer (sic) with a (huge!) disk drive—about the size of four washing machines. They had also designed a binary image array processor and programming language, complete with a user's guide, to facilitate designing software for this one-of-a-kind processor. The overall system enabled programmable real-time image processing at video rate for many operations. I had the whole lab to myself. I designed software that detected an object in the field of view, tracked its movements in real time, and displayed a running description of the events in English. For example: "An object has appeared in the upper right

cornerItismovingdownandtotheleftNowtheobjectisgettingcloserThe object moved out of sight to the left”—about like that. The algorithms were simple, relying on a sufficient image intensity difference to separate the object from the background (a plain wall). From computer vision papers I had read, I knew that vision in general imaging conditions is much more sophisticated. But it worked, it was great fun, and I was hooked.

The Atlas of Beauty

The humorous yet poignant novel of West Indian migrant life in London that adds an iconic voice to the growing Caribbean canon A Penguin Classic Set in London in the 1960's, when the UK encouraged its Commonwealth citizens to emigrate as a result of the post-war labor shortage, *The Housing Lark* explores the Caribbean migrant experience in the "Mother Country" by following a group of friends as they attempt to buy a home together. Despite encountering a racist and predatory rental market, the friends scheme, often comically, to find a literal and figurative place of their own. Will these motley folks, male and female, Black and Indian, from Trinidad and Jamaica, dreamers, hustlers, and artists, be able to achieve this milestone of upward mobility? Unique and wonderful, comic and serious, cynical and tenderhearted, *The Housing Lark* poses the question of whether their "lark," or quixotic idea of finding a home, can ever become a reality. Kittitian-British novelist and playwright Caryl Phillips contributes a foreword, while postcolonial literature scholar Dohra Ahmad provides a contextual introduction.

Mr. Beethoven

Bingo Grabbins is a soddit who enjoys a comfortable life (apart from his feet, of course). But his contentment is disturbed when the wizard, Gandef, and a company of bizarrely Welsh dwarves drag him away on an adventure. They have a plot to raid the treasure hoard (or so they say) guarded by Smug, a large and very tedious dragon. Bingo is reluctant to take part in this insane venture, but a dwarven dagger held to his throat soon surprises even himself and off the companions go on a quest that seems truly epic (well, until you read about what later happened to Bingo's cousin, at any rate). Oh, and Bingo finds this ring thing

Taxation Laws of Indonesia

At a level for doctoral or medical students in neurosciences, audiology, or physiology, *Physiology of the Ear, 2E* has brought together in a complete and concise manner a compilation of articles written by experts in their specialty and addressing clinical and basic science aspects of ear physiology. The text begins with a history of the discovery of the anatomy and physiology of the ear and works systematically from the external, middle, and inner ear to the brain. Easy to read and understand, this text can be used as a resource or as a tool for study and review. It covers topics such as sound and bone conduction mechanisms, signal processing, stimulus coding in the auditory system, blood circulation of the cochlea, and auditory brain mapping. It highlights the application of new research findings to the management problems encountered in everyday practice, and covers important aspects of nonauditory physiology such as skin migration in the ear canal.

The Mermaid of Black Conch

The narrator of *Villa Triste*, an anxious, roving, stateless young man of eighteen, arrives in a small French lakeside town near Switzerland in the early 1960s. The young man hides among the other summer visitors until he meets a beautiful young actress named Yvonne Jacquet, and a strange doctor, Ren Meinthe. These two invite him into their world of soirees and late-night debauchery. But when real life beckons once again, he finds no sympathy from his new companions. Modiano has written a haunting novel that captures lost youth and the search for identity.

The Thief

Based on the author's online photography project, this stunning collection features portraits of 500 women from more than 50 countries, accompanied by revelatory captions that capture their personal stories. Since 2013 photographer Mihaela Noroc has traveled the world with her backpack and camera taking photos of everyday women to showcase the diversity of beauty all around us. *The Atlas of Beauty* is a collection of her photographs celebrating women from all corners of the world, revealing that beauty is everywhere, and that it comes in many different sizes and colors. Noroc's colorful and moving portraits feature women in their local communities, ranging from the Amazon rainforest to London city streets, and from markets in India to parks in Harlem, visually juxtaposing the varied physical and social worlds these women inhabit. Packaged as a gift-worthy, hardcover book, *The Atlas of Beauty* presents a fresh perspective on the global lives of women today.

QuickTest Professional (QTP) Interview Questions and Guidelines

Dr Alaparthi Chitti Babu BSc. MS general surgery from Osmania medical college Hyderabad settled as a General practitioner, in medical practice since the last sixty years. This Autobiography, in general, reflect the state of medical practice in India since last six decades; of course with a personal and regional flavour, recording my experiences and medical case records, that I encountered in various stages of my

training and medical practice.

Industrial Relations and Labour Laws for Managers

Having moved from the Fens to the Midlands to the Scottish Borders, Jessie Noon finds herself struggling to leave the past behind. Following a family tragedy, Jessie Noon moved from the Fens to the Midlands and now lives in the Scottish Borders with a cat, a dog and - she is convinced - a ghost in the spare room. Her husband walked out almost a year ago, leaving a note written in steam on the bathroom mirror, and Jessie hasn't seen her son for years. When Jessie meets Robert, a local outreach worker, they are drawn to one another and begin a relationship; meanwhile, Jessie has begun receiving messages telling her I'm on my way home. As a translator, Jessie worries over what seems like the terrible responsibility of choosing the right words. It isn't exactly a matter of life and death, said her husband, but Jessie knows otherwise. This is a novel about communication and miscommunication and lives hanging in the balance (a child going missing, a boy in a coma, an unborn baby), occupying the fine line between life and death, between existing and not existing.

The Sing of the Shore

The book presents high-quality research papers presented at the first international conference, ICICCD 2016, organised by the Department of Electronics, Instrumentation and Control Engineering of University of Petroleum and Energy Studies, Dehradun on 2nd and 3rd April, 2016. The book is broadly divided into three sections: Intelligent Communication, Intelligent Control and Intelligent Devices. The areas covered under these sections are wireless communication and radio technologies, optical communication, communication hardware evolution, machine-to-machine communication networks, routing techniques, network analytics, network applications and services, satellite and space communications, technologies for e-communication, wireless Ad-Hoc and sensor networks, communications and information security, signal processing for communications, communication software, microwave informatics, robotics and automation, optimization techniques and algorithms, intelligent transport, mechatronics system, guidance and navigation, algorithms, linear/non-linear control, home automation, sensors, smart cities, control systems, high performance computing, cognition control, adaptive control, distributed control, prediction models, hybrid control system, control applications, power system, manufacturing, agriculture cyber physical system, network control system, genetic control based, wearable devices, nano devices, MEMS, bio-inspired computing, embedded and real-time software, VLSI and embedded systems, FPGA, digital system and logic design, image and video processing, machine vision, medical imaging, and reconfigurable computing systems.

A Silent Fury

Last Days Of India S Freedom Struggle Had Many Distinct Features Leading To The Abolition Of The Raj. Among The More Important Of Them Was The Trial Of The Ina Personnel, Who Had Fought Against The British Under Subhas Chandra Bose In

East Asia With The Object Of Achieving The Indian Independence. The Author Has Made A Sincere Attempt To Present British Reaction Towards The Ina In General And Towards The Adventures Of Shah Nawaz Khan, Gurbaksh Singh Dhillon And Prem Kumar Sahgal, In Particular. The Three Under Trials Belonging To Different Religious Communities Became A Symbol Of Communal Unity And Amity Welded By A Burning Desire To Free The Country From Foreign Yoke. The Book Is An In-Depth Study Of The Ina Trial. The Author Incorporates The National Upsurge Against The Trial, Which Not Only Contributed To The Release Of The Trio, But Also To The Winning Of Indian Independence From The Rule Of British Colonialism. The Book, It Is Hoped, Will Be Of Great Value For Students, Research Scholars And Teachers Of Modern Indian History. The Legal Points Raised In The Trial Are Of Great Interest For The Lawyers, Common Readers Will Also Find The Book Interesting.
