In a book poised to become the bible of innovation, a renowned creativity expert reveals the key to the creative process—"borrowing". As a former aerospace scientist, Fortune 500 executive, chief innovation officer, inventor, and software entrepreneur, David Kord Murray has made a living by coming up with innovative ideas. In Borrowing Brilliance he shows readers how new ideas are merely the combination of existing ones by presenting a simple six-step process that anyone can use to build business innovation: ?Defining-Define the problem you're trying to solve. ?Borrowing-Borrow ideas from places with a similar problem. ?Combining-

Connect and combine these borrowed ideas. ?Incubating-Allow the combinations to incubate into a solution. ?Judging-Identify the strength and weakness of the solution. ?Enhancing-Eliminate weak points while enhancing strong ones. Each chapter features real-life examples of brilliant borrowers, including profiles of Larry Page and Sergey Brin (the Google guys), George Lucas, Steve Jobs, and other creative thinkers. Murray used these methods to re-create his own career and he shows readers how to harness them to find creative solutions.

## **The Debt**

How could General Electric—perhaps America's most iconic corporation—suffer such a swift and sudden fall from grace? This is the definitive history of General Electric's epic decline, as told by the two Wall Street Journal reporters who covered its fall. Since its founding in 1892, GE has been more than just a corporation. For generations, it was job security, a solidly safe investment, and an elite business education for top managers. GE electrified America, powering everything from lightbulbs to turbines, and became fully integrated into the American societal mindset as few companies ever had. And after two decades of leadership under legendary CEO Jack Welch, GE entered the twenty-first century as America's most valuable corporation. Yet, fewer than two decades later, the GE of old was gone. Lights Out examines how Welch's handpicked successor, Jeff Immelt, tried to fix flaws in Welch's profit machine, while stumbling headlong into mistakes of his own. In the end, GE's traditional win-at-all-costs driven culture seemed to lose its direction, which ultimately caused the company's decline on both a personal and organizational scale. Lights Out details how one of America's all-time great companies has been reduced to a cautionary tale for our times.

It was supposed to be a simple job, but nothing is ever simple. Just a couple weeks in the Winston Isles, where no one knows that I'm a royal knight. Turns out, I'm a dead ringer for the billionaire Lord Arlington. Acting as his double should have been the easiest money I've ever made--until someone tries to kill me. Since I'm still pretending to be a lord, I have no choice but to hire a smart mouthed, tight assed bodyguard. She's the last thing I need. But she's quickly becoming the only thing I want. She's determined, clever, and smart-mouthed. She's the perfect woman. And she has no idea I'm an imposter. Good thing I have no intention of falling for her, or else I'd be royally screwed.
