This edition has been thoroughly revised and enlarged. It is still considered to be a must for all those sitting Civil Engineering examinations.

The Mutation Theory

Sebastian Rödl undermines a foundational dogma of contemporary philosophy: that knowledge, in order to be objective, must be knowledge of something that is as it is, independent of being known to be so. This profound work revives the thought that knowledge, precisely on account of being objective, is self-knowledge: knowledge knowing itself.

Test of Reasoning and General Intelligence

Adopting a lucid approach, the book aims to develop an appreciation of the seriousness of the environmental crisis at the local and global levels. The text discusses the major environmental problems we face today: global warming, overexploitation of natural resources, degraded land, disappearing forests, endangered species, rising pollution, growing population, and dangerous toxins, among others. The book illustrates various problems, solutions, successes, and failures with numerous Indian and global examples. Written in a student-friendly manner, the text is enriched with a number of photographs and illustrations.

History of Modern India

History of Modern India presents an authoritative overview of the history of what

was known as British India. The text is largely based on the author's research on nationalism and colonialism in India and also draws from the works of eminent historians of the period. Challenging and revising colonial and nationalist interpretations of history, this book moves away from a largely political narrative to a social, economic and religious history of modern India. It explains how conditions in India during the eighteenth century helped the British East India Company establish its rule in India. It also gives us important insights into the primary aim of colonial rule which was the economic exploitation of India through trade and investment. The topics are arranged thematically in order to showcase the various forces that went into the making of independent India. However, in the entire arrangement of themes, the chronology of the period is enmeshed innovatively with the various forces that evolved both as a cause and effect of British imperialist rule of the subcontinent. The book also provides a detailed account of the nationalist movement and introduces us to the contributions of different individuals who were behind the nationalist movement. A comprehensive textbook for students of history and interested readers, History of Modern India is essential reading for a broad based understanding of the making of modern India.

1815-1915, from the Congress of Vienna to the War of 1914

Playwright, poet, essayist, flamboyant man-about-town, Oscar Wilde pack an astonishing amount of work, genius, and controversy into two short decades, producing masterworks in every literary genre. This selection includes almost all of his short stories, including "The Canterville Ghost," "The Fisherman and his Soul," and "The Remarkable Rocket." Alongside THE MODEL MILLIONAIRE, Harper Perennial will publish the short fiction of Fyodor Dostoevsky, Herman Melville, Willa Cather, Leo Tolstoy, and Stephen Crane to be packaged in a beautifully designed, boldly colorful boxset in the aim to attract contemporary fans of short fiction to these revered masters of the form. Also, in each of these selections will appear a story from one of the new collections being published in the "Summer of the Short Story." A story from Simon Van Booy's forthcoming collection, LOVE BEGINS IN WINTER, will be printed at the back of this volume.
