Crossroads of Twilight

Twilight of a World

A hauntingly beautiful photographic guide to the lore and landscapes of the vampire, from the master of gothic imagery Using infrared film to convey the ethereal atmosphere of his subjects, Marsden has traveled from Germany to the United States, and Slovakia to Scotland as he hunts out the vampires of myth and literature, and real individuals suspected of vampirism. His images include sites of perennial fascination, such as Vlad Dracul's ruined palace in the wilderness of Romania, and more recent places of vampire pilgrimage, like the Etruscan city of Volterra in Italy, home to Twilight's ancient vampire coven. They are accompanied by his authoritative and entrancing text, filled with rare discoveries and travelers' tales, plus extracts from classics such as Bram Stoker's Dracula, and an introduction that charts the secret history of the vampire right up to the darkly romantic figure of today. Stunning, chilling, this title will satisfy gothic devotees and prove a timeless introduction for new fans of the vampire genre.

Everyone tells him that he is Jerry Raigan, a drunken movie star on the decline, and "Arthur Curtis" is a character Raigan is playing. Curtis drives to where his home should be, but finds no evidence of his life. Raigan's agent, thinking his client is having a nervous breakdown, tells Curtis not to worry about returning to the set, the picture has been cancelled and the sets are being dismantled. Curtis realizes that the last link to his world is about to be destroyed. This popular long-running series centered around paranoia, uncertainty and bizarre events, often with a wicked sense of humor and an unexpected twist. Series creator Rod Serling called The Twilight Zone, "a fifth dimension beyond that which is known to man a dimension as vast as space and as timeless as infinity. It lies between the pit of man's fears, and the summit of his knowledge".

Twilight at the Well of Souls

Another war, the most terrible nuclear disaster in the history of man has scorched and crippled all life on the surface of earth. In a few isolated zones human survival has occurred. Among these groups the birth rate is said to be phenomenal. There are reports of strange mutations of the human species appearing as frequently as fifty or sixty in a hundred births. A physical and mental examination of these freaks is being undertaken at the present time.

What starts as a simple diplomatic mission ends in bloody tragedy, and soon Castus and his men are fighting for their lives—and it isn't long before the legionnaire discovers that nothing about his doomed mission was ever what it seemed. Twilight of the Idols and The Antichrist

The soil of central India hides more than the bones of long-dead giants. The East India Company is master of almost the entire subcontinent, but real power is now with the Crown. Far from the great games of the empire, Captain William Henry Sleeman is content to administer Jabalpur district and dig for remnants of petrified bones with his charming and knowledgeable wife. Until he is tasked with investigating the activities of an obscure group of criminals who are said to strangle their victims. As Sleeman uncovers the many layers of the Phansigar problem, he finds a language unlike any other, and a set of beliefs, lore and superstitions seemingly drawn from the soul of the countryside. He finds orchards of corpses, and a hierarchy of stranglers, but also ordinary men driven to murder. He hears subtle murmurs of discontentment at the changes which have come to a land believed by some to be unchanging. He finds auguries of a conflict to come. And behind it all, the legend of a mysterious, beautiful man, whose capture might be the key to understanding the Phansigars. Sleeman's inquiries will make him confront the nature of his beloved adopted homeland and of the mighty people in Calcutta who he serves. Through the prism of caste, the consequent web of intricate social and cultural relationships, and the nature of travel in the hinterland, he will see the real face of India and come across its uncomfortable, bleak truths.

But to unravel such truths is not easy...

The Twilight Zone explores the possibilities inhering in the ordinary. A Twilight Zone episode can move us by being poignant and intimate, rambunctious or thought provoking. It can also be orchestrated as a set of intertwined plot developments or as a serial progression. But regardless of whether it takes place on an asteroid, in a city pool room, or in the backwoods, it will usually convey both a folklorist's eye for detail and the born raconteur's sense of pace. Rod Serling, the show's founder, main scriptwriter, and artistic director, knew how much burden he could place on his rhetorical and dramatic gifts. Deservedly celebrated as a pioneer in TV science fiction, he also writes about history and loyalty, the grip of everyday reality, and the dangers of both forgetting about one's ghosts and giving them the upper hand.

In this stunning and revealing book, Peter Maass examines the social, political, and environmental impact of petroleum on the countries that produce it. Every unhappy oil-producing nation is unhappy in its own way, but all are touched by the "resource curse"—the power of oil to exacerbate existing problems and create new ones. Peter Maass presents a vivid portrait of the troubled world oil has created. From Saudi Arabia to Equatorial Guinea, from Venezuela to Iraq, the stories of rebels, royalty, middlemen, environmentalists, indigenous activists, and CEOs—all deftly and sensitively presented—come together in this startling and essential account of the consequences of our addiction to oil.

Thunder at Twilight

This book recounts and analyzes the complex series of conflicts between the Hellenistic Successor states in the generation before the Romans intervened in, and ultimately conquered, the region. This period is rarely treated in any depth, usually warranting little more than a summary as context for a discussion of the Roman conquests. The authors demonstrate that this period of almost-constant conflict and rivalry makes a fascinating subject of study in its own right. For example, it describes Macedon's war with Cleomenes and the final crushing of a

much-diminished Sparta as an independent power; also the campaigns in the east whereby the Seleucid king, Antiochus (later defeated by the Romans at Magnesia) earned his title of Antiochus the Great. They show how the Hellenistic monarchs, while aware of Rome's epic clash with Carthage in the West, did not yet see her as a major threat and were preoccupied with more immediate concerns. As well as clearly narrating the complex events, Roberts and Bennet assess the various military systems of the Hellenistic states and developments in warfare on land and sea. This is a very original book on a neglected period of politico-military history.

National Bestseller * Named one of Rolling Stone's Best Music Books of 2018 * One of Newsweek's 50 Best Books of 2018 * A Billboard Best of 2018 * A New York Times Book Review "New and Noteworthy" selection "A wise meditation on why classic rock stars keep trucking, both on the road and in our dreams. Every page is an irresistible argument starter."—Rob Sheffield, Rolling Stone The author of the critically acclaimed Your Favorite Band is Killing Me offers an eye-opening exploration of the state of classic rock, its past and future, the impact it has had, and what its loss would mean to an industry, a culture, and a way of life. Since the late 1960s, a legendary cadre of artists—including the Rolling Stones, Bob Dylan, Neil Young, Bruce Springsteen, Fleetwood Mac, the Eagles, Black Sabbath, and the Who—has revolutionized popular culture and the sounds of our lives. While their songs still get airtime and some of these bands continue to tour, its idols are leaving the stage permanently. Can classic rock remain relevant as these legends die off, or will this major musical subculture fade away as many have before, Steven Hyden asks. In this mix of personal memoir, criticism, and journalism, Hyden stands witness as classic rock reaches the precipice. Traveling to the eclectic places where geriatric rockers are still making music, he talks to the artists

and fans who have aged with them, explores the ways that classic rock has changed the culture, investigates the rise and fall of classic rock radio, and turns to live bootlegs, tell-all rock biographies, and even the liner notes of rock's greatest masterpieces to tell the story of what this music meant, and how it will be remembered, for fans like himself. *Twilight of the Gods* is also Hyden's story. Celebrating his love of this incredible music that has taken him from adolescence to fatherhood, he ponders two essential questions: Is it time to give up on his childhood heroes, or can this music teach him about growing old with his hopes and dreams intact? And what can we all learn from rock gods and their music—are they ephemeral or eternal?

Thunder at Twilight is a landmark historical vision, drawing on hitherto untapped sources to illuminate two crucial years in the life of the extraordinary city of Vienna—and in the life of the twentieth century. It was during the carnival of 1913 that a young Stalin arrived in Vienna on a mission that would launch him into the upper

echelon of Russian revolutionaries, and it was here that he first collided with Trotsky. It was in Vienna that the failed artist Adolf Hitler kept daubing watercolors and spouting tirades at fellow drifters in a flophouse. Here Archduke Franz Ferdinand had a troubled audience with Emperor Franz Joseph—and soon the bullet that killed the Archduke would set off the Great War that would kill ten million more. With luminous prose that has twice made him a finalist for the National Book Award, Frederic Morton evokes the opulent, elegant, incomparable sunset metropolis-Vienna on the brink of cataclysm.

Twilight of the Hellenistic World

A passionate account of how the gulf between France's metropolitan elites and its working classes are tearing the country apart Christophe Guilluy, a French geographer, makes the case that France has become an "American society"—one that is both increasingly multicultural and increasingly unequal. The divide between the global economy's winners and losers in today's France has replaced the old left-right split, leaving many on "the periphery." As Guilluy shows, there is no unified French economy, and those cut off from the country's new economic citadels suffer disproportionately on both economic and social fronts. In Guilluy's analysis, the lip service paid to the idea of an "open society" in France is a smoke screen meant to hide the emergence of a closed society, walled off for the benefit of the upper classes. The ruling classes in France are reaching a dangerous stage, he argues; without the stability of a growing economy, the hope for those excluded

from growth is extinguished, undermining the legitimacy of a multicultural nation.

Twilight in a Knotted World

Twilight in the Desert reveals a Saudi oil and production industry that could soon approach a serious, irreversible decline. In this exhaustively researched book, veteran oil industry analyst Matthew Simmons draws on his three-plus decades of insider experience and more than 200 independently produced reports about Saudi petroleum resources and production operations. He uncovers a story about Saudi Arabia's troubled oil industry, not to mention its political and societal instability, which differs sharply from the globally accepted Saudi version. It's a story that is provocative and disturbing, based on undeniable facts, but until now never told in its entirety. *Twilight in the Desert* answers all readers' questions about Saudi oil and production industries with keen examination instead of unsubstantiated posturing, and takes its place as one of the most important books of this still-young century.

Battle For Rome

Andrew Bacevich is a leading American public intellectual, writing in the fields of culture and politics with particular attention to war and America's role in the world. *Twilight of the American Century* is a collection of his selected essays written since 9/11. In these essays, Bacevich critically examines the U.S. response to the events of September 2001, as they have played out in the years since, radically affecting the way Americans see themselves and their nation's place in the world. Bacevich is the author of nearly a dozen books and contributes to a wide variety of publications, including *Foreign Affairs*, *The Nation*, *Commonweal*, *Harper's*, and the *London Review of Books*. His op-eds have appeared in the *New York Times*, *Washington Post*, and the *Wall Street Journal*, among other newspapers. Prior to becoming an academic, he was a professional soldier. His experience as an Army officer informs his abiding concern regarding the misuse of American military power and the shortcomings of the U.S. military system. As a historian, he has tried to see the past differently, thereby making it usable to the present. Bacevich combines the perspective of a scholar with the background of a practitioner. His views defy neat categorization as either liberal or conservative. He belongs to no "school." His voice and his views are distinctive, provocative, and refreshing. Those with a focus on political and cultural developments and who have a critical interest in America's role in the world will be keenly interested in this book.

The World of Twilight Monk Volume1

"How did our democracy go wrong? This extraordinary document . . . is Applebaum's answer." —Timothy Snyder, author of *On Tyranny* A Pulitzer Prize-winning historian explains, with electrifying clarity, why elites in democracies around the world are turning toward nationalism and authoritarianism. From the United States and Britain to continental Europe and beyond, liberal democracy is under siege, while authoritarianism is on the rise. In *Twilight of Democracy*, Anne Applebaum, an award-winning historian of Soviet atrocities who was one of the first American journalists to raise an alarm about antidemocratic trends in the West, explains the lure of nationalism and autocracy. In this captivating essay, she contends that political systems with radically simple beliefs are inherently appealing, especially when they benefit the loyal to the exclusion of everyone else. Despotism does not rule alone; they rely on political allies, bureaucrats, and media figures to pave their way and support their rule. The authoritarian and nationalist parties that have arisen within modern democracies offer new paths to wealth or power for their adherents. Applebaum describes many of the new advocates of illiberalism in countries around the world, showing how they use conspiracy theory, political polarization, social media, and even nostalgia to change their societies. Elegantly written and urgently argued, *Twilight of Democracy* is a brilliant dissection of a world-shaking shift and a stirring glimpse of the road back to democratic values.
