Computers & Electronics

Managing new product development is a key area of management, straddling strategy, innovation and entrepreneurship and macro-organizational behaviour. All of the contributors in the Handbook of New Product Development are well-known and leading exponents to theory of New Product Development and to methods used in practice. They draw upon their experience and work to offer a comprehensive view of the challenges in managing the development of new products. Existing knowledge in the different topics is examined and the key management challenges, and the important gaps in our knowledge are discussed. Most of the chapters draw upon systematic interaction with companies and practice and this is presented in the examples and the case studies cited. The Handbook of New Product Development and Management surveys this area in the context of an overall framework that explains how aspects interact and combine in a successful NPD process. Each chapter outlines open questions and highlights needs for future research. *A comprehensive view of the challenges in managing the development of new products from well-known and leading contributors in the field * The first handbook to fill the gap for a high-level handbook which is valuable to both the academic/practitioner

"Understand what makes your equipment tick; do simple repairs yourself; follow quick-and-easy instructions; learn how to get reliable professional repairs when you need it--and avoid ripoffs"--Cover.

The New Beacon

Reviews a variety of current consumer products and helps consumers obtain the most value for their money.

The Fourth International Symposium on Wearable Computers

Annotation Proceedings of the October 2000 symposium that addressed questions such as the ways wearable computers are superior, what applications and advantages does the interface afford that are not possible with more traditional ones, how to move from the virtual space of a desktop to the physical world of a mobile user, what defines wearability, and other related topics. The keynote address and 36 contributions discuss issues such as context awareness, user modeling, augmented realities, memory prosthetics, training systems, power generation and distribution systems, networking, perception, industrial design, and fashion. Lacks a subject index. Annotation copyrighted by Book News, Inc., Portland, OR.
