Everybody talks about the worship, but nobody does anything about it. The well-known quote associated with Mark Twain actually goes like this—Everybody talks about the weather But changing it to "worship" seems appropriate. With *Worship Essentials*, Dove Award-winning worship leader Mike Harland helps leaders do something about it. Perhaps no subject about church generates more opinion and passion than worship. Walk with the typical church-going family on their way to the car after the service and just listen. Everybody really does talk about worship. Now, veteran worship leader and experienced ministry coach Mike Harland offers the tools worship leaders need to build biblically-faithful and effective worship ministries without bringing the disruption that often accompanies change. Psalm 67:5 reads, "Let the peoples praise you, God, let all the peoples praise you." *Worship Essentials* is here to help.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to:

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems

Damocles On The Couch, is about getting your life straight, and it is about stories. Throughout history humans have used stories as vehicles to communicate and pass along information. Herb Stricklin, therapist and educator, has found that

stories are a tremendous tool for relaying information regarding sound principles to live one's life by. Stories afford the listener an opportunity to take the information that they are hearing and apply it to their lives on a much deeper level than just hearing cold hard facts. Jesus used parables to relay some of his most powerful messages. Ancient Greeks and Romans used plays to both entertain and educate those witnessing the performance. Morality plays, such as The Sword Of Damocles, help us to learn life lessons and understand the human condition. In this story, Damocles finds himself placed in a chair with a sword dangling over his head suspended by a single hair. The angst and fear that he experiences is a universal experience for humans (not necessarily a sword, but we have all had things "hanging over our heads"). Stricklin uses stories such as this to paint a picture for people regarding healthy and unhealthy ways of confronting life's many challenges.

Perfect Turkeys is the second in a series of books, that examines (through short stories) the often hilarious, and always funny life and times of Michael Devin Hughes. Whether searching for the Perfect Turkey for Thanksgiving, or trying to locate the Fig Queen's House in Brewster Hollow, or reserving a hotel room with a chain hotel, Michael Devin Hughes complicates the most simple of tasks. Though quadruple-divorced, Hughes maintains relations with his ex-wives and children, as the short stories, "Dancing With My Daughter," "A Walk at Sunset With My Son," and "Chief of Personal Appearance" reveal. Michael Devin Hughes' obsessive nature is deliciously illustrated in "Lemon Bars." His humorous bond with his father is wonderfully amplified in "The Buffet Line." And Hughes incredibly bad timing is hilariously detailed in "Dinner and Railroad Crossings."

Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details

exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

Generation TreX: My Thoughts is a journal recounting the personal experiences and insights of a young man while he plans a 27-month non-motorized trek of service throughout America. 1/24/00 - What will become of this quest? Will anyone care? I don't have an answer for these questions and I'm not sure I really want to. To be honest, I'm feeling a little tired of this idealistic crusade. I have no desire to make it a big hoopla event. I've been writing that the success of the Trek depends upon my commitment to the principles and not the attention it receives. In reality, however, I have been living the opposite. I have gotten so focused on the image and organization of the Trek that I have stopped simply doing it. This Trek is about exemplifying certain qualities in life, not getting on a TV show. It is about having the courage to display an example for others to follow. I don't have control of its scale (how many people hear about it), I just have control of its success (living its principles regardless of the circumstances). If I make it home it will be nothing short of a miracle. I don't know if I will complete the goal of the 10,350 mile Trek. I do know that I believe in its mission and have to try. I may set out on the Trek, but it is the support team and the people I meet along the way that will bring me home.
